

# CONTENTS

	Foreword .....	xv
	Statements of Policy .....	xvii
	Personnel .....	xix
	Summary of Changes .....	xxxi
	List of Changes in BC Order .....	xxxiii
<b>PART KG</b>	<b>GENERAL REQUIREMENTS</b> .....	1
<b>Article KG-1</b>	<b>Scope and Jurisdiction</b> .....	1
KG-100	Scope .....	1
KG-110	Geometric Scope of This Division .....	2
KG-120	Classifications Outside the Scope of This Division .....	2
KG-130	Field Assembly of Vessels .....	2
KG-140	Standards Referenced by This Division .....	3
KG-150	Units of Measurement .....	3
<b>Article KG-2</b>	<b>Organization of This Division</b> .....	6
KG-200	Organization .....	6
KG-210	Parts of This Division .....	6
KG-220	Appendices .....	6
KG-230	Articles and Paragraphs .....	6
KG-240	References .....	6
KG-250	Terms and Definitions .....	6
<b>Article KG-3</b>	<b>Responsibilities and Duties</b> .....	7
KG-300	General .....	7
KG-310	User's Responsibility .....	7
KG-320	Manufacturer's Responsibility .....	9
KG-330	Designer .....	10
<b>Article KG-4</b>	<b>General Rules for Inspection</b> .....	11
KG-400	General Requirements for Inspection and Examination .....	11
KG-410	Manufacturer's Responsibilities .....	11
KG-420	Certification of Subcontracted Services .....	12
KG-430	The Inspector .....	12
KG-440	Inspector's Duties .....	13
<b>Table</b>		
KG-141	Referenced Standards in This Division and Year of Acceptable Edition .....	4
<b>PART KM</b>	<b>MATERIAL REQUIREMENTS</b> .....	14
<b>Article KM-1</b>	<b>General Requirements</b> .....	14
KM-100	Materials Permitted .....	14

<b>Article KM-2</b>	<b>Mechanical Property Test Requirements for Metals</b> .....	16
KM-200	General Requirements .....	16
KM-210	Procedure for Obtaining Test Specimens and Coupons .....	16
KM-220	Procedure for Heat Treating Separate Test Specimens .....	18
KM-230	Mechanical Testing Requirements .....	18
KM-240	Heat Treatment Certification/Verification Tests for Fabricated Components .....	21
KM-250	Supplementary Toughness Requirements for Pressure-Retaining Component Materials .....	22
KM-260	Retests .....	22
<b>Article KM-3</b>	<b>Supplementary Requirements for Bolting</b> .....	24
KM-300	Requirements for All Bolting Materials .....	25
<b>Article KM-4</b>	<b>Material Design Data</b> .....	25
KM-400	Contents of Tables of Material Design Data .....	24
<b>Figure</b>		
KM-212	Examples of Acceptable Impact Test Specimens .....	19
<b>Tables</b>		
KM-212	Charpy Impact Test Temperature Reduction Below Minimum Design Metal Temperature .....	17
KM-234.2(a)	Minimum Required Charpy V-Notch Impact Values for Pressure-Retaining Component Materials .....	20
KM-234.2(b)	Minimum Required Charpy V-Notch Impact Values for Bolting Materials .....	21
KCS-1	Carbon and Low Alloy Steels .....	26
KCS-1M	Carbon and Low Alloy Steels (Metric) .....	29
KHA-1	High Alloy Steels .....	32
KHA-1M	High Alloy Steels (Metric) .....	35
KNF-1	Nickel and Nickel Alloys .....	38
KNF-1M	Nickel and Nickel Alloys (Metric) .....	39
<b>PART KD</b>	<b>DESIGN REQUIREMENTS</b> .....	41
<b>Article KD-1</b>	<b>General</b> .....	41
KD-100	Scope .....	41
KD-110	Loadings .....	42
KD-120	Design Basis .....	42
KD-130	Design Criteria .....	43
KD-140	Fatigue Evaluation .....	43
<b>Article KD-2</b>	<b>Basic Design Requirements</b> .....	44
KD-200	Scope .....	44
KD-210	Terms Relating to Stress Analysis .....	44
KD-220	Equations for Cylindrical and Spherical Shells .....	46
KD-230	Elastic-Plastic Analysis .....	47
KD-240	Linear Elastic Analysis .....	48
KD-250	Principal Stresses in Monobloc Vessels .....	49
<b>Article KD-3</b>	<b>Fatigue Evaluation</b> .....	52
KD-300	Scope .....	52
KD-310	Stress Analysis for Fatigue Evaluation .....	52

KD-320	Calculated Number of Design Cycles .....	54
KD-330	Calculated Cumulative Effect Number of Design Cycles.....	55
<b>Article KD-4</b>	<b>Fracture Mechanics Evaluation.....</b>	<b>74</b>
KD-400	Scope .....	74
KD-410	Crack Size Criteria.....	74
KD-420	Stress Intensity Factor $K_I$ Calculation .....	75
KD-430	Calculation of Crack Growth Rates .....	75
KD-440	Calculated Number of Design Cycles .....	75
<b>Article KD-5</b>	<b>Design Using Autofrettage .....</b>	<b>77</b>
KD-500	Scope .....	77
KD-510	Limits on Autofrettage Pressure .....	78
KD-520	Calculation of Residual Stresses.....	78
KD-530	Design Calculations.....	79
<b>Article KD-6</b>	<b>Design Requirements for Closures, Integral Heads, Threaded Fasteners, and Seals.....</b>	<b>80</b>
KD-600	Scope .....	80
KD-620	Threaded Fasteners .....	80
KD-630	Load-Carrying Shell With Single Threaded End Closures .....	81
KD-640	Flat Integral Heads.....	82
KD-650	Quick-Actuating Closures .....	82
KD-660	Requirements for Closures and Seals .....	83
<b>Article KD-7</b>	<b>Design Requirements for Attachments, Supports, and External Heating and Cooling Jackets .....</b>	<b>84</b>
KD-700	General Requirements .....	84
KD-710	Materials for Attachments .....	84
KD-720	Welds Attaching Nonpressure Parts to Pressure Parts.....	84
KD-730	Design of Attachments .....	85
KD-740	Design of Supports .....	85
KD-750	Jacketed Vessels.....	85
<b>Article KD-8</b>	<b>Special Design Requirements for Layered Vessels .....</b>	<b>87</b>
KD-800	General.....	87
KD-810	Rules for Shrink-Fit Layered Vessels .....	88
KD-820	Rules for Concentrically Wrapped and Welded Layered Vessels.....	90
KD-830	Design of Welded Joints .....	91
KD-840	Openings and Their Reinforcement .....	91
KD-850	Supports .....	91
<b>Article KD-9</b>	<b>Special Design Requirements for Wire-Wound Vessels and Wire-Wound Frames.....</b>	<b>97</b>
KD-900	Scope .....	97
KD-910	Stress Analysis .....	97
KD-920	Stress Limits .....	99
KD-930	Fatigue Evaluation.....	99
<b>Article KD-10</b>	<b>Special Requirements for Vessels in High Pressure Gaseous Hydrogen Transport and Storage Service .....</b>	<b>102</b>
KD-1000	Scope .....	102
KD-1010	Fracture Mechanics Evaluation.....	103

KD-1020	Fracture Mechanics Properties .....	103
KD-1030	Fatigue Life Calculation .....	103
KD-1040	Test Method for $K_{IH}$ Determination .....	103
KD-1050	Fatigue Crack Growth Rate Tests .....	104
<b>Article KD-11</b>	<b>Design Requirements for Welded Vessels .....</b>	<b>107</b>
KD-1100	Scope .....	107
KD-1110	Types of Joints Permitted .....	107
KD-1120	Transition Joints Between Sections of Unequal Thickness .....	107
KD-1130	Nozzle Attachments .....	108
<b>Article KD-12</b>	<b>Experimental Design Verification .....</b>	<b>113</b>
KD-1200	General Requirements .....	113
KD-1210	Types of Tests .....	113
KD-1220	Strain Measurement Test Procedure .....	113
KD-1230	Photoelastic Test Procedure .....	114
KD-1240	Test Procedures .....	114
KD-1250	Interpretation of Results .....	114
KD-1260	Experimental Determination of Allowable Number of Operating Cycles .....	115
KD-1270	Determination of Fatigue Strength Reduction Factors .....	117
<b>Figures</b>		
KD-240	Stress Categories and Limits of Stress Intensity .....	50
KD-320.1	Design Fatigue Curves $S_a = f(N_f)$ for Nonwelded Machined Parts Made of Forged Carbon or Low Alloy Steels .....	56
KD-320.1M	Design Fatigue Curves $S_a = f(N_f)$ for Nonwelded Machined Parts Made of Forged Carbon or Low Alloy Steels .....	59
KD-320.2	Design Fatigue Curve $S_a = f(N_f)$ for Welded Parts Made of Carbon or Low Alloy Steels .....	62
KD-320.2M	Design Fatigue Curve $S_a = f(N_f)$ for Welded Parts Made of Carbon or Low Alloy Steels .....	63
KD-320.3	Design Fatigue Curve for Austenitic Stainless Steels for Temperatures Not Exceeding 800°F .....	64
KD-320.3M	Design Fatigue Curve for Austenitic Stainless Steels for Temperatures Not Exceeding 427°C .....	65
KD-320.4	Design Fatigue Curve $S_a = f(N_f)$ for Nonwelded Machined Parts Made of 17-4PH/15-5PH Stainless Steel Bar or Forgings, for Temperatures Not Exceeding 550°F .....	66
KD-320.4M	Design Fatigue Curve $S_a = f(N_f)$ for Nonwelded Machined Parts Made of 17-4PH/15-5PH Stainless Steel Bar or Forgings, for Temperatures Not Exceeding 290°C .....	67
KD-320.5	Design Fatigue Curve for High-Strength Steel Bolting for Temperatures Not Exceeding 700°F .....	68
KD-320.5M	Design Fatigue Curve for High-Strength Steel Bolting for Temperatures Not Exceeding 371°C .....	69
KD-320.5(a)	Roughness Factor $K_r$ Versus Average Surface Roughness $R_a$ Microinch AA .....	70
KD-320.5M(a)	Roughness Factor $K_r$ Versus Average Surface Roughness $R_a$ Micrometer AA .....	71
KD-320.5(b)	Roughness Factor $K_r$ Versus Maximum Surface Roughness $R_{max}$ Microinch .....	72
KD-320.5M(b)	Roughness Factor $K_r$ Versus Maximum Surface Roughness $R_{max}$ Micrometer .....	73
KD-700	Some Illustrative Weld Attachment Details .....	86
KD-812	Diameters and Layer Numbers for Concentric Shrink-Fit Layered Cylinder .....	89
KD-830.1	Acceptable Layered Shell Types .....	91
KD-830.2	Some Acceptable Solid-to-Layered Attachments .....	92
KD-830.3	Some Acceptable Flat Heads With Hubs Joining Layered Shell Sections .....	93

KD-830.4	Some Acceptable Flanges for Layered Shells . . . . .	94
KD-830.5	Some Acceptable Welded Joints of Layered-to-Layered and Layered-to-Solid Sections . . . . .	94
KD-830.6	Some Acceptable Nozzle Attachments in Layered Shell Sections . . . . .	95
KD-850	Some Acceptable Supports for Layered Vessels. . . . .	96
KD-900	Wire-Wound Vessel and Frame Construction . . . . .	98
KD-911	Nomenclature for Wire-Wound Cylinders . . . . .	99
KD-932	Derivation of Design Fatigue Curve From Wire Fatigue Curve . . . . .	100
KD-1112	Typical Pressure Parts With Butt-Welded Hubs. . . . .	108
KD-1121	Joints Between Formed Heads and Shells . . . . .	109
KD-1122	Nozzle Necks Attached to Piping of Lesser Wall Thickness. . . . .	110
KD-1130	Some Acceptable Welded Nozzle Attachments . . . . .	111
KD-1131	An Acceptable Full-Penetration Welded Nozzle Attachment Not Readily Radiographable. . . . .	112
KD-1260.1	Construction of Testing Parameter Ratio Diagram. . . . .	116
KD-1260.2	Construction of Testing Parameter Ratio Diagram for Accelerated Tests. . . . .	118
 <b>Tables</b>		
KD-230	Tabular Values for Coefficients . . . . .	48
KD-320.1	Tabulated Values of $S_a$ , ksi, From Figures Indicated . . . . .	57
KD-320.1M	Tabulated Values of $S_a$ , MPa, From Figures Indicated. . . . .	60
KD-430	Crack Growth Rate Factors (U.S. Customary Units). . . . .	76
KD-430M	Crack Growth Rate Factors (SI Units) . . . . .	76
 <b>PART KF FABRICATION REQUIREMENTS . . . . . 119</b>		
<b>Article KF-1</b>	<b>General Fabrication Requirements . . . . .</b>	<b>119</b>
KF-100	General . . . . .	119
KF-110	Material . . . . .	119
KF-120	Material Forming . . . . .	120
KF-130	Tolerances for Cylindrical and Spherical Shells and Heads. . . . .	121
 <b>Article KF-2</b>	 <b>Supplemental Welding Fabrication Requirements . . . . .</b>	 <b>122</b>
KF-200	General Requirements for All Welds . . . . .	122
KF-210	Welding Qualifications and Records . . . . .	122
KF-220	Weld Joints Permitted and Their Examination . . . . .	123
KF-230	Requirements During Welding . . . . .	124
KF-240	Repair of Weld Defects . . . . .	126
 <b>Article KF-3</b>	 <b>Fabrication Requirements for Materials With Protective Linings . . . . .</b>	 <b>127</b>
KF-300	Scope . . . . .	127
KF-310	Qualification of Welding Procedures. . . . .	127
KF-320	Integrally Clad Materials . . . . .	128
KF-330	Postweld Heat Treatment of Linings. . . . .	128
KF-340	Examination Requirements . . . . .	128
KF-350	Inspection and Tests . . . . .	129
KF-360	Stamping and Reports. . . . .	129
 <b>Article KF-4</b>	 <b>Heat Treatment of Weldments . . . . .</b>	 <b>130</b>
KF-400	Heat Treatment of Weldments . . . . .	130
KF-410	Heating Procedures for Postweld Heat Treatment . . . . .	132
KF-420	Postweld Heat Treatment After Repairs . . . . .	133

<b>Article KF-5</b>	<b>Additional Fabrication Requirements for Autofrettaged Vessels</b> .....	135
KF-500	General.....	135
KF-510	Examination and Repair.....	135
KF-520	Autofrettage Procedures.....	135
KF-530	Examination After Autofrettage.....	135
KF-540	Repair of Defects After Autofrettage.....	135
KF-550	Stamping and Reports.....	135
<b>Article KF-6</b>	<b>Additional Fabrication Requirements for Quenched and Tempered Steels</b> .....	136
KF-600	General.....	136
KF-610	Welding Requirements.....	136
KF-620	Temporary Welds Where Not Prohibited.....	137
KF-630	Postweld Heat Treatment.....	137
KF-640	Examination and Testing.....	138
KF-650	Stamping and Reports.....	138
<b>Article KF-7</b>	<b>Supplementary Requirements for Materials With Welding Restrictions</b> .....	140
KF-700	Scope.....	140
KF-710	Repair of Defects.....	140
KF-720	Methods of Forming Forged Heads.....	140
<b>Article KF-8</b>	<b>Specific Fabrication Requirements for Layered Vessels</b> .....	141
KF-800	Scope.....	141
KF-810	Rules for Shrink-Fit Vessels.....	141
KF-820	Rules for Concentrically Wrapped Welded Layered Vessels.....	141
KF-830	Heat Treatment of Weldments.....	148
<b>Article KF-9</b>	<b>Special Fabrication Requirements for Wire-Wound Vessels and Frames</b> .....	149
KF-900	Scope.....	149
KF-910	Fabrication Requirements.....	149
<b>Article KF-11</b>	<b>Additional Fabrication Requirements for Welding Age-Hardening Stainless Steels</b> .....	151
KF-1100	Scope.....	151
KF-1110	Welding Requirements.....	151
KF-1120	Base Metal Heat Treatment Condition.....	151
KF-1130	Temporary Welds Where Not Prohibited.....	151
KF-1140	Postweld Heat Treatment.....	151
KF-1150	Production Weld Testing.....	151
KF-1160	Examination and Testing.....	152
KF-1170	Repair Welding.....	152
KF-1180	Postweld Heat Treatment After Weld Repairs.....	152
<b>Figures</b>		
KF-131	Examples of Differences Between Maximum and Minimum Diameters in Cylindrical Shells.....	121

KF-234	Maximum Allowable Offset in Welded Joints .....	125
KF-402.1	Requirements for Postweld Heat Treatment of Pressure Parts and Attachments (U.S. Customary Units) .....	131
KF-402.1M	Requirements for Postweld Heat Treatment of Pressure Parts and Attachments (SI Units).....	132
KF-630	Postweld Heat Treatment Requirements for Quenched and Tempered Materials in Table KCS-1 (U.S. Customary Units) .....	137
KF-630M	Postweld Heat Treatment Requirements for Quenched and Tempered Materials in Table KCS-1M (SI Units) .....	138
<b>PART KR</b>	<b>PRESSURE RELIEF DEVICES</b> .....	<b>153</b>
<b>Article KR-1</b>	<b>General Requirements</b> .....	<b>153</b>
KR-100	Protection Against Overpressure.....	153
KR-110	Definitions .....	153
KR-120	Types of Overpressure Protection .....	154
KR-130	Size of Openings and Nozzles .....	155
KR-140	Intervening Stop Valves .....	155
KR-150	Permissible Overpressures .....	155
KR-160	Set Pressures .....	155
<b>Article KR-2</b>	<b>Requirements for Rupture Disk Devices</b> .....	<b>157</b>
KR-200	Materials for Rupture Disk Devices .....	157
KR-210	Flow Capacity Rating .....	157
KR-220	Rupture Disk Devices Used in Combination With Flow Capacity Certified Pressure Relief Valves .....	157
<b>Article KR-3</b>	<b>Requirements for Pressure Relief Valves</b> .....	<b>159</b>
KR-300	General Requirements .....	159
KR-310	Design Requirements.....	160
KR-320	Material Selection .....	160
KR-330	Inspection of Manufacturing and/or Assembly of Pressure Relief Valves .....	160
KR-340	Production Testing by Manufacturers and Assemblers .....	160
<b>Article KR-4</b>	<b>Marking and Stamping Requirements</b> .....	<b>162</b>
KR-400	Marking .....	162
KR-410	Use of Code Symbol Stamp .....	163
<b>Article KR-5</b>	<b>Certification of Flow Capacity of Pressure Relief Valves</b> .....	<b>164</b>
KR-500	Flow Capacity Certification Tests .....	164
KR-510	Recertification Testing .....	164
KR-520	Procedures for Flow Capacity Certification Tests .....	164
KR-530	Flow Capacity Conversions.....	167
KR-540	Flow Capacity Certification Testing Requirements for Test Facilities.....	167
KR-550	Test Data Reports .....	167
KR-560	Certification of Flow Capacity of Pressure Relief Valves in Combination With Rupture Disk Devices.....	168
KR-570	Optional Testing of Rupture Disk Devices and Pressure Relief Valves .....	168

<b>Figures</b>	
KR-401	Official Symbol for Stamp to Denote the American Society of Mechanical Engineers' Standard ..... 162
KR-523.3	Constant <i>C</i> for Gas Versus Specific Heat Ratio (U.S. Customary Units)..... 166
KR-523.3M	Constant <i>C</i> for Gas Versus Specific Heat Ratio (SI Units) ..... 166
<b>PART KE</b>	<b>EXAMINATION REQUIREMENTS</b> ..... 169
<b>Article KE-1</b>	<b>Requirements for Examination Procedures and Personnel Qualification</b> ..... 169
KE-100	General..... 169
KE-110	Qualification and Certification of Nondestructive Examination Personnel ..... 169
<b>Article KE-2</b>	<b>Requirements for Examination and Repair of Material</b> ..... 173
KE-200	General Requirements..... 173
KE-210	General Requirements for Repair of Defects..... 173
KE-220	Examination and Repair of Plate ..... 174
KE-230	Examination and Repair of Forgings and Bars..... 174
KE-240	Examination and Repair of Seamless and Welded (Without Filler Metal) Tubular Products and Fittings..... 176
KE-250	Examination and Repair of Tubular Products and Fittings Welded With Filler Metal ..... 178
KE-260	Examination of Bolts, Studs, and Nuts..... 178
<b>Article KE-3</b>	<b>Examination of Welds and Acceptance Criteria</b> ..... 180
KE-300	Examination of Welds and Weld Overlay ..... 180
KE-310	Examination of Weld Edge Preparation Surfaces..... 181
KE-320	Types of Welds and Their Examination ..... 181
KE-330	Acceptance Standards ..... 182
<b>Article KE-4</b>	<b>Final Examination of Vessels</b> ..... 184
KE-400	Surface Examination After Hydrotest ..... 184
