

2010 International Conference on Technology Management and Innovation

TMI 2010 Table of Contents

Message from General Chairs
Message from Program Chairs
Organizing Committee
Reviewers

TMI 2010

Abaqus Based Finite Element Modeling Thin Walled Ring Rolling

Zuo Zhijiang and Li Yao

Algorithm of Contrast Enhancement Based on Molybdenum-target X-ray Images

Duan Zhu, Sun Lei, and Zhao Dan Ting

Analysis of Moment Structure Software Application in Organizational Behavior

Jia Liuzhan and Sun Bukuan

Analysis of Service Engineer Cultivation Models for Chinese Communications Industry

Lu Haijun and Sun Fuping

Analysis on the Construction of Metal Mine Production Information Management System with Object-Oriented Technique

Xinrui Liu, Hongbin Ma, Hongdi Zhao, and Fengyu Ren

Analysis on the Level of Technological Progress of High-Tech Industries in China: With the Perspective of Economic Growth and Constant-Elasticity-of-Substitution Production Function

Chen Yuke

A New Technique of Disambiguating Combination Ambiguity

Dingrong Yuan, Xinyou Li, Yangcai Xie, and Yanzhen Shao

Application of Computer Technology to Mold Design and Numerical Simulation Analysis of Automobile Idle Gear

Wang Jie and Tang Ji

Application of DPS Software in Technological Innovation Performance Evaluation of Metallurgy Industrial Enterprise

He Ling and Qiu Jianhua

Application of Intelligent Decision Support System Development Platform in Cross-Basin Water Transfer

Wang Wei

Application of Microscopic Simulation Technology in a Pre-signal Control Method at a Complex Intersection

Jianli Zhao and Jianping Wu

Application of Routing Technology in VPN Client

Qiang Chen and Yannian Wang

Application of the Cellular Automata Model Based on the Stock Market

Wang Haiqi, Wang Wenxu, and Pang He

Application of SaaS Model in Knowledge Management

Du Weihui

Applications of Fractal Theory in Sealing Performance Analysis on Premium Connection

Yan Xiangzhen, Yang Xiujian, Yang Henglin, and Li Gensheng

A Predictive Model of 3D Menu Performance on Mobile Phone Based on Fitts' Law and Hick-Hyman Law

Ronglong Xu, Zhengjie Liu, and Ning Zhang

Comparative Study on Science and Technology Progress Status of Hunan Province: Based on the Data from 12 Regions in 2008

Sun Qian and Tang Yong

Computer Aided Visualized Analysis System of Fault Tree

Su Xiaoqin and Nie Junlan

Computer Application in Civil Engineering: Nonlinear Time-history Response Analysis of Viaduct Bridge Based on TDAP III

Wang Zhanfei, Sui Weining, and Liao Jing

Critical Factors of ERP Implementation for SMEs in China

He Chao and Xu Kang

Design of Heterogeneous Data Source Query System Based on XML

Zhu Rongrong, Mu Qi, and Li Zhanli

Determination of Optimal Indexes of Coal Preparation by Using the Software of MATLAB and LINGO

Zhijun Zhang and Jiongtian Liu

Digital Art Creation Subjects of the Information Era

Tu Bo and Dai Dandan

Discussion the Application of Clothing CAD System in Colleges Teaching

Peng Hong and Liu Zhiqiang

E-health Technology in Assessment and Treatment of Body Image Disturbance

Xia Xu

Empirical Research on Effect of Value Added Tax Transition on R&D Investment of China's Hi-tech Industry

Chen Hansong and Bu Wei

Estimation of Optimum Population Scale Based on Arable Land and Terrain Constraints in the Mountains Region of Southern Gansu Province in China

- Qin Jing, Sun Hongjie, Niu Shuwen, and Hu Lili*
Evaluation of Mineral Resources Reserve Based on IDS
- Zhanglin Li and Xialin Zhang*
Exergy Analysis of Ship Main Propulsion Plant Integrated Energy System
- Zaili Zhao and Zhaofeng Yuan*
Experimental Study on T-shaped Concrete-Filled Steel Tube Core Columns Subjected to Axial-Compression
- Xu Yafeng, Zhang Yubo, and Cui Laiqi*
Innovation and Realization of Knowledge Management in the Supply Chain
- Li Shuning*
Inside the Schema Management of FDO
- Pengfei Zhang and Yan Li*
Interface Design of Man-Machine Engineering System Based on SkinMagic
- Wang Jing and Sun Shouqian*
Interpretation of Passive Urbanization Based on the Survey
- Su Li, Yue Liu, Hao Xie, and Jing Wu*
Knowledge-Driven Product Innovation Design
- Ligang Tai, Tiejun Zhao, and Dianqi Li*
Method and Software of Technical Risk Assessment for a Civil Aero-engine
- Tu Qiuye, Zhang Wei, Cai Yuanhu, and Zhou Li*
Modeling and Simulating for Multiple Aircrafts Three-dimensional Routes Planning
- Wang Guoshi, Li Qiang, and Guo Lejiang*
Multi-agent Based Alarm Processing System for MSW Incineration
- Hairui Wang, Ya Li, and Ying Jiang*
Nano Risk Management and Coping Strategies of Nanotechnology
- Jun Chen, Yanguang Lu, Cheng Sun, and Tianyu Yang*
Optimal Mechanism of Global Supply Chain with Disruption
- Yang Yong*
Optimization Model for Smelting Metallic Magnesium by Siliconthermic Reducing Method Based on BP Neural Networks
- Gao Feng, Ge Yingxin, Wang Guosheng, and Liu Yunyi*
Reflecting on Application of NVivo in Management Field
- Zhang Chonghui and Yuan Haijun*
Research and Application of Web Service Classification on Emergency Platform Based on UDDI
- Li Bin, Liu Ying, and Zhang Shuo*
Research and Development of Hydrogen Permeation Barrier Coatings of Stainless Steel Surface
- Yongfeng Li, Qiongqi Wang, Wenbin Kan, and Hongliang Pan*
Research on Internet Chinese News Geography Name Text Mining
- Cai Wei, Wang Yinglin, and Li Wei*
Researches on the Financial Information System Based on SAP R/3-FICO
- Wu Yi and Wu Fengping*

Research on China's Equipment Manufacturing Industrial Security Based on Industrial Controlling Power

Bu Wei, Ma Yaqin, and Cao Ling

Research on Support Vector Machine Method Using in Gas Well Casing Reliability and Life Analysis

Yang Xiujuan, Yan Xiangzhen, Li Wenfei, Li Gensheng, and Dou Yuling

Search Engine and E-Commerce Applications in China

Haichao Wang

Sequencing and Policy Effects of the Factors Influencing Innovative Performance of the High-Level Talents in Wuhan

Zhihong Li

Simulation Analysis and Research on the Vibration Velocity for the Electromagnetic Vibration Feeding System Based on MATLAB Software

Shuiqin Zhu

Simulation for Operating Reliability Analysis of Longitudinal Paving Mechanism Driven by Hydraulic System of Straw-checkerboard Sand Barriers Paving Robot

Jiang Xuesong, Li Chunwei, and Wang Jingfeng

Simulation of Ship Motion Based on External Dynamic Behavior of EON

Li Zhen and Wang Yufeng

Study on Teaching Evaluation Based on System Engineering Theory

He Qiang

Study on the Application of AI for the Non Player Character in Computer Games

Yang Kuang and Jie Jiang

Study on the Residual Strength of Casings with Defects Basing on CAE (Computer Assistant Engineering) Stimulation Technology

Wang Tongtao, Yan Xiangzhen, Yu Chengpeng, Yang Xiujuan, Chen Ming, and Li Gensheng

Susceptibility Analysis of Landslide Hazard in Qingjiang Valley Based on GIS Terrain Factors

Mao Wei, Yan Echuan, Li Zhimin, and Zhou Yanlong

Technical Analysis and Prospect of Cloud Computing

Zhao Limin and Liu Jiwei

The Applicable Research of Moving Average Model in Non-symmetric Network Storage

Wei Xiong and Hu Luokai

The Application of Computer Measurement and Control Technology in a Tester for Single-Jet Nozzles of Aero Engine

Wang Yemu and Lv Dongyan

The Application of Finite Element Analysis Software ANSYS on the Design of Reciprocating Natural Gas Compressor

Zhang Yong

The Application of Social Software in Construction and Management of Instructional Tacit Resources in University

Dandan Wei and Lexing Qiu

The Comparison of MATLAB Simulators for Associative Learning Theories: ALTSim, HMS and Rapid-REM

Wu Si

The Criss-Cross Concrete-Filled Steel Tube Core Column on Capacity Variation of Non-Linear Analysis

Xu Yafeng and Hao Lili

The Digital Technology Brings Forth the Innovation of the New Media Advertisement Form

Zhu Lingyu and Ding Ying

The Discussion on the Construction of Global Modular Network of Chinese Shipbuilding Industry

Lu Haijun and Gan Zhixia

The Effect Evaluation of Food Financial Subsidy Policies to Food Quantitative Security

Wenru Zang and Xinhong Fu

The Factors Influencing Customer's Trust in Online-Product under C2C Environment

Zhu Donghong and Chang Yaping

The Research on Software Security Vulnerabilities Mining

Liu Shuyu, Kong Weiguang, and Yang Diwei

The Research on the Audit Misstatement Risk of Assessment Methodology Based on Rough Neural Network

Yang Xun

Research on the Effects of Social Capital on the Operation of Agricultural Cooperatives: the Case of Sichuan Province, China

Zeng Weizhong, Fu Xinhong, Chen Xiulan, and Li Li

The Web Database Connection Technology Based on JSP

Liu Li

Unit Concurrent Fault Diagnosis Based on Artificial Immune System and Evidence Theory: Design of Unit Fault Diagnosis System Software

Zhang Qinghua and Zhu Yuejun

Visual Simulation Software Development of Exhaust-gas Diffusion in a Kitchen Burning Liquefied-Gas

Yongan Ao, Lin Shen, Chao Gu, and Xin Jia

WebGIS-based Management System for Water-use in Irrigation Area

Su Li and Wang Jingkuan

3D Simulation Technology of Hydrocarbon Migration and Accumulation and Its Application in Songnan-Baodao Area of Qiongdongnan Basin, South China Sea

Jun Xiao and Bei Zhu

Digital Mine: High Technology for Mine Management

Zhang Xialin, Li Zhanglin, Weng Zhengping, and Wu Chonglong

The Research of Generation Algorithm of Detectors in a New Negative Selection Algorithm

Zhang Qinghua and Zhao Hongxia
