

CONTENTS

Foreword	ix
Statements of Policy	xi
Personnel	xiii
Introduction	xxv
Summary of Changes	xxix
List of Changes in BC Order	xxx
Part RG	
General Requirements	1
RG-1 Scope and Jurisdiction	1
RG-2 Organization	3
RG-3 Responsibilities and Duties	4
RG-4 Fabrication Methods	7
Part RM	
Material Requirements	8
RM-1 General Requirements	8
RM-2 Miscellaneous Pressure Parts	11
Tables	
RM-120.1 Resin Systems Required Certification by Resin Manufacturer	9
RM-120.2 Resin Systems Required Test by Vessel Fabricator	9
Part RD	
Design Requirements	12
RD-1 General	12
RD-2 Shells of Revolution Under Internal Pressure	15
RD-3 Shells of Revolution Under External Pressure	16
RD-4 Secondary Bonding	17
RD-5 Openings and Their Reinforcement	18
RD-6 Nozzles and Other Connections	19
RD-7 Bolted Connections	26
RD-8 Quick-Actuating Closures (for Class I Vessels Only)	28
RD-9 Attachments and Supports	29
RD-10 Access and Inspection Openings	30
RD-11 Mandatory Design Rules for Class II Vessels	32
RD-12 Laminate Stiffness Coefficients	51
Figures	
RD-620.3 Flange Tolerances	22
RD-620.4(a) Plate-Type Gussets	23
RD-620.4(b) Typical Cone-Type Gusset	23
RD-620.5 Flush Nozzle Installation	24
RD-620.6 Penetrating Nozzle Installation	25
RD-700.1 Acceptable Types of Flat Heads for Class I Vessels	27
RD-1120.1 Design Limitations for Class II Vessels	33
RD-1174.2 Dimensions of Reinforcing Pad and Nozzle Overlays	37
RD-1174.3 Stress Concentration Factors for a Circular Hole in a Pressurized Cylindrical Shell	39

RD-1175.2	Head/Shell or Shell/Shell Overlay Dimensions.....	40
RD-1176.1	Design of Full-Face Nozzle Flanges	43
RD-1176.2	Values of V (Integral Flange Factor).....	44
RD-1176.3	Values of F (Integral Flange Factor).....	45
RD-1176.4	Values of f (Hub Stress Correction Factor).....	46
RD-1176.5	Values of T , Z , Y , and U (Terms Involving K).....	47
RD-1220.1	Moment Resultants	52
RD-1220.2	In-Plane Force Resultants	52
RD-1220.3	Coordinate Systems.....	53
RD-1220.4	Geometry of an N -Layered Laminate	53
 Tables		
RD-620.1	Flange and Nozzle Dimensions for Hand Lay-Up and Pressure Molded Flanges.....	20
RD-1173.2	Values of Spherical Radius Factor K_o for Ellipsoidal Heads With Pressure on Convex Side.....	36
 Part RF		
	Fabrication Requirements	56
RF-1	General Requirements.....	56
RF-2	Special Fabrication Requirements for Bag-Molding Process (for Class I Vessels Only)	57
RF-3	Special Fabrication Requirements for Centrifugal-Casting Process (for Class I Vessels Only).....	59
RF-4	Special Fabrication Requirements for Filament-Winding Process (Classes I and II)	60
RF-5	Special Fabrication Requirements for Contact-Molding Process (Classes I and II)	62
RF-6	Special Fabrication Requirements for Matched Molded Heads (Used for Closures for Centrifugally Cast Vessels — for Class I Vessels Only).....	64
RF-7	Special Fabrication Requirements for Joining Components.....	66
 Figures		
RF-210.1	Fiber Side Wall Lay-Up for Bag Molding.....	57
RF-210.2	Head or End Preform for Cylindrical Vessel	58
RF-610.1	Fiber Preform and Insert for Head for Centrifugally Cast Vessel	64
RF-610.2	Fiber Head or End Preformed Inserts for Centrifugally Cast Vessel Heads	65
 Part RQ		
	Qualification Requirements	67
RQ-1	Scope	67
RQ-2	Special Requirements for Bag-Molding Procedure Qualification (Class I Vessels).....	70
RQ-3	Special Requirements for Centrifugal-Casting Procedure Qualification (Class I Vessels).....	71
RQ-4	Special Requirements for Filament-Winding Procedure Qualification (Class I Vessels).....	72
RQ-5	Special Requirements for Contact-Molding Procedure Qualification (Class I Vessels).....	73
RQ-6	Special Requirements for Class II Vessels.....	74
 Part RR		
	Pressure Relief Devices	75
RR-1	General Requirements.....	75
RR-2	Provisions in Vessels for Installation of Pressure Relief Devices	77

Part RT	Rules Governing Testing	78
RT-1	Testing Requirements	78
RT-2	Design and Procedure Qualification Test Requirements for Class I Vessels	79
RT-3	Quality Control Test and Examination Requirements for Class I Vessels	83
RT-4	Production Test Requirements for Class I Vessels	85
RT-5	Hydrostatic Testing Procedures and Equipment for Class I and Class II Vessels	88
RT-6	Acceptance Test Procedure for Class II Vessels	89
RT-7	Determination of Mechanical Properties of Lamina for Use With Class II Vessels	91
RT-8	Test Methods for Determining Damage-Based Design Criterion	93
Figure		
RT-840	Loading Schedule	95
Tables		
RT-620.1	Evaluation Criteria	90
RT-854.1	<i>K</i> Factor for Historic Index	95
Part RI	Inspection Requirements	96
RI-1	General	96
RI-2	Special Inspection Requirements for Bag Molding (Class I Vessels)	98
RI-3	Special Inspection Requirements for Centrifugal Casting (Class I Vessels)	99
RI-4	Special Inspection Requirements for Filament Winding	101
RI-5	Special Inspection Requirements for Contact Molding	102
Part RS	Marking, Stamping, and Reports	103
RS-1	Contents, Methods, and Means of Marking	103
RS-2	Use of Code Symbol Stamps	105
RS-3	Report Forms	106
Figure		
RS-100.1	Official Symbol for Mark to Denote The American Society of Mechanical Engineers' Standard	103
RS-132.1	Form of Stamping and Marking	104
MANDATORY APPENDICES		
1	Quality Control System	107
2	Capacity Conversions for Safety Valves	109
3	Submittal of Technical Inquiries to the Boiler and Pressure Vessel Committee	112
4	Glossary of Terms Related to Fiber-Reinforced Plastics	114
5	Specific Gravity of Liquid Resins	123
6	Structural Laminate Visual Acceptance Criteria	124
7	Standard Units for Use in Equations	129
NONMANDATORY APPENDICES		
AA	Suggested Methods of Preliminary Design for Class I Vessels	130
AB	Installation and Operation	136
AC	Discontinuity Stresses for Class II, Method B Vessels	138
AD	Laminate Theory	152
AF	Examples for Design Rules for Class II Vessels	165
AG	Guide to Information Appearing on Certificate of Authorization	168
AH	Guidance for the Use of U.S. Customary and SI Units in the ASME Boiler and Pressure Vessel Code	170
AI	Rigorous NASA SP-8007 Solution for Lateral and Longitudinal Pressure	173
Forms	177
