The next edition of this Standard is scheduled for publication in 2012. There will be no addenda issued to this edition.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this Standard. Interpretations are published on the ASME Web site under the Committee Pages at http://cstools.asme.org as they are issued.

Items approved as errata to this edition are published on the ASME Web site under Committee Pages at http://cstools.asme.org.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not “approve,” “rate,” or “endorse” any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assumes any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,
in an electronic retrieval system or otherwise,
without the prior written permission of the publisher.
CONTENTS

Foreword ........................................................................ vi
Committee Roster ................................................................. ix
Correspondence With the B16 Committee ...................................................... x

1 Scope ................................................................................................. 1
2 Pressure–Temperature Ratings ................................................................. 2
3 Component Size ..................................................................................... 3
4 Marking ..................................................................................................... 3
5 Materials .................................................................................................. 7
6 Dimensions ............................................................................................... 9
7 Tolerances ................................................................................................ 12
8 Pressure Testing ........................................................................................ 14

Figures
1 Method of Designating Location of Auxiliary Connections When Specified .............................................................. 15
2 Method of Designating Outlets of Reducing Fittings in Specifications ................................................................. 16
3 Thread Length for Connection Tapping .............................................................................................................. 17
4 Socket Welding for Connections ......................................................................................................................... 17
5 Butt Welding for Connections ............................................................................................................................. 17
6 Bosses for Connections ................................................................................................................................. 17
7 End Flange Facings and Their Relationship to Flange Thickness and Center-to-End and End-to-End Dimensions ............................................................... 18
8 Bevel for Wall Thicknesses \( t \) From 5 mm to 22 mm Inclusive ............................................................................ 19
9 Bevel for Wall Thicknesses \( t \) Greater Than 22 mm .......................................................................................... 20
10 Inside Contour for Use With Rectangular Backing Ring .................................................................................. 20
11 Inside Contour for Use With Taper Backing Ring ............................................................................................. 21
12 Bevel for Outside Thickness .......................................................................................................................... 21
13 Bevel for Inside Thickness .............................................................................................................................. 21
14 Bevel for Combined Thickness ...................................................................................................................... 22
15 Straight Hub Welding Flanges .......................................................................................................................... 22

Tables
1A List of Material Specifications ............................................................................. 4
1B List of Bolting Specifications Applicable ASTM Specifications ........................ 8
1C Flange Bolting Dimensional Recommendations ............................................................ 12
2-1.1 Pressure–Temperature Ratings for Group 1.1 Materials ....................................... 23
2-1.2 Pressure–Temperature Ratings for Group 1.2 Materials ....................................... 24
2-1.3 Pressure–Temperature Ratings for Group 1.3 Materials ....................................... 25
2-1.4 Pressure–Temperature Ratings for Group 1.4 Materials ....................................... 26
2-1.5 Pressure–Temperature Ratings for Group 1.5 Materials ....................................... 27
2-1.7 Pressure–Temperature Ratings for Group 1.7 Materials ....................................... 28
2-1.9 Pressure–Temperature Ratings for Group 1.9 Materials ....................................... 29
19 Templates for Drilling Class 1500 Pipe Flanges ........................................ 97
20 Dimensions of Class 1500 Flanges .............................................................. 98
21 Templates for Drilling Class 2500 Pipe Flanges ....................................... 100
22 Dimensions of Class 2500 Flanges .............................................................. 101

Mandatory Appendices
I Threading of Pipe for American National Standard Threaded Flanges .......... 103
II Pressure–Temperature Ratings and Dimensional Data for Classes 150, 300, 400, 600, 900, 1500, and 2500 Flanges and Classes 150 and 300 Flanged Fittings in U.S. Customary Units ........................................ 105
III References .................................................................................................. 193

Nonmandatory Appendices
A Method Used for Establishing Pressure–Temperature Ratings ................. 196
B Limiting Dimensions of Gaskets Other Than Ring Joint Gaskets .............. 200
C Method for Calculating Bolt Lengths .......................................................... 202
D Quality System Program ............................................................................. 204
E Dimensions of Classes 400, 600, 900, 1500, and 2500 Flanged Fittings in U.S. Customary Units ................................................................. 205
