Preface	xvii
Acknowledgments	xix
Accreditation	xxi
Forewords	xxii
Metric Conversion of Some Common Units	xxv

Chapter 1 Introduction to Hydrocarbon Liquid Pipelines	1
1.1 Liquid Hydrocarbon Transportation System Scope	1
1.2 Hydrocarbon Liquid Pipelines	1
1.3 Liquid Pipeline Transportation System	3
1.4 Types of Transmission Pipelines	5
1.5 Liquid Petroleum Pipeline Networks	5
1.6 Single Versus Multiple Products Pipeline	11
1.6.1 Refined Petroleum Products	11
1.7 Liquid Pipeline Development History/Chronology	12
1.7.1 Historical Overview	12
1.7.2 Codes, Standards and Regulations (Addressing Liquid Pipeline Design, Construction and Operation)	15
1.7.3 Codes	15
1.7.4 Regulations	16
1.8 Major Pipeline Facilities Layout	22
1.8.1 Pump Station	22
1.8.2 Metering/Measurement	22
1.8.3 Valve and Manifolds	26
1.8.3.1 Valves	26
1.8.3.2 Manifolds	27
1.9 General Pipeline Operations	28
References	29

Chapter 2 Hydrocarbon Liquid Properties	31
2.1 Hydrocarbon Liquids	31
2.2 Hydrocarbon Liquids Phase Behavior	32
2.2.1 Phase Diagram Determination	34
2.3 Properties of Petroleum Liquids	37
2.3.1 Mass, Volume, and Density	38
2.3.2 Density and Thermal Expansion	38
2.3.3 Compressibility, Bulk Modulus, and Thermal Expansion	38
2.3.3.1 Compressibility	38
2.3.3.2 Bulk Modulus K	39
2.3.3.3 Thermal Expansion	40
2.3.3.4 Calculating Bulk Modulus for Various Fluids	41
2.3.3.5 Other Techniques for Calculating Bulk Modulus	42
2.4 Specific Gravity and API Gravity	42
2.4.1 Specific Gravities of Blended Products	44
2.5 Viscosity, Newtonian Versus Non-Newtonian	45
2.5.1 Viscosity and Density Relationship	48
2.5.2 Viscosity of Blended/Diluted Liquids	48
2.5.2.1 (A) New Volume from Current Volume, Current SG, and Target SG	48
2.5.2.2 (B) Viscosity Blending Calculation	48
2.5.3 Hydrocarbon Liquids Blending and Volume Shrinkage	49
2.5.4 Viscosity Determination	50
2.6 Pour Point and Viscosity Relationship	50
2.6.1 Reasons for Pour Point Determination	51
2.7 Vapor Pressure	52
2.7.1 True Vapor Pressure	52
2.8 Flash Point	55
2.9 Hydrocarbon Liquid Specific Heat Capacity	55
2.10 Thermal Conductivity	56
2.11 Effect of Hydrocarbon Liquid Properties on Measurement Systems	57
2.11.1 (a) Base Conditions	57
2.11.2 (b) Impact of Phase Change	57
2.11.3 Properties Important to Measurement Systems	57
2.11.4 Factors Affecting Measurement Accuracy	58
References	59

Chapter 3 System Hydraulics and Design	63
3.1 Fundamentals of Liquid Pipeline Hydraulics	63
3.1.1 Pipeline Flow Equations	63
3.1.1.1 Continuity or Mass Conservation Equation	64
3.1.1.2 Momentum Equation	64

3.1.1.3	Energy Equation	67
3.1.1.4	Equation of State	68
3.1.2	Solution Methods	68
3.1.2.1	Method of Characteristics	69
3.1.2.2	Explicit Methods	69
3.1.2.3	Implicit Methods	69
3.1.3	Steady-State Solutions and Design Equations	70
3.1.3.1	Solution of Continuity Equation and Volume Correction	71
3.1.3.2	Solution of Momentum Equation and Pressure Profile Calculation	72
3.1.3.3	Solution of Energy Equation and Temperature Profile Calculation	75
3.2	Design Process	83
3.2.1	Codes and Standards	83
3.2.2	Design Factors (9)	84
3.2.2.1	Supply and Demand	84
3.2.2.2	Pipeline Route and Environmental Issues	85
3.2.2.3	Operating Parameters	86
3.2.2.4	Pipe Parameters	89
3.2.2.5	Pumping Parameters	93
3.2.2.6	Economic Factors	93
3.2.3	Hydraulic Design Procedure	96
3.3	Liquid Pipeline Design	98
3.3.1	Crude Oil Pipeline System — Isothermal Flow	99
3.3.2	Pipeline Configurations	104
3.3.2.1	Side Stream Delivery	105
3.3.2.2	Side Stream Injection	108
3.3.2.3	Pipeline in Series	112
3.3.2.4	Pipelines in Parallel	114
3.3.3	Severe Elevation Change — Slack Flow	115
3.3.4	Severe Weather Conditions	119
3.3.4.1	Pipeline in a Hot Environment	119
3.3.4.2	Pipeline in a Cold Environment	119
3.3.5	Batch Pipeline Hydraulics Design	120
3.3.6	High Vapor Pressure (HVP) Pipeline Design	122
3.3.7	Heavy Crude Pipeline Hydraulic Design	129
3.3.7.1	Determine the Physical Properties Under Pipeline Conditions	130
3.3.7.2	Determine the Pressure and Temperature Throughout the Pipeline for the Anticipated Flow Rates	131
3.3.7.3	Review the Restart After Shutdown	132
3.3.7.4	Design Facilities	133
3.4	Locating Pump Stations	136

Addenda to Chapter 3	144
A3.1 Temperature Calculation	144
A3.2 Erosional Velocity of Fluid	148
A3.3 Minor Pressure Losses	149
A3.4 Effect of Pressure and Temperature on Pipe Volume	154
References	157
<hr/>	
Chapter 4 Pumps and Pump Stations	159
4.1 Introduction	159
4.2 Centrifugal Pumps	160
4.3 Centrifugal Pump Types	161
4.3.1 End Suction Single Stage Pumps	161
4.3.2 Vertical In-Line Single Stage Pumps	161
4.3.3 Horizontal Axially Split Between-Bearing Single-Stage Pumps	161
4.3.4 Horizontal Axially Split Between-Bearing Multi-Stage Pumps	161
4.3.5 Double-Case (Can) Vertically Suspended Volute Pumps	162
4.4 Pump Selection and Sizing	164
4.4.1 Pump Performance	164
4.4.1.1 Pump Performance Curves	165
4.4.2 Service Conditions	165
4.4.3 Net Positive Suction Head (NPSH)	167
4.4.3.1 Net Positive Suction Head Required (NPSHR)	167
4.4.3.2 Net Positive Suction Head Available (NPSHA)	168
4.4.4 Specific Speed	169
4.4.5 Suction Specific Speed	170
4.4.6 Pump Performance Curve Characteristics	171
4.4.7 Centrifugal Pump Power and Efficiency	172
4.4.8 Performance Modifications for Varying Pipeline Applications	172
4.4.9 Cavitation	176
4.4.10 Viscous Hydrocarbon Behavior in Pumps	180
4.4.11 Temperature Rise	181
4.4.12 Minimum Flow	182
4.5 Pump Specification and Purchase	182
4.5.1 Pump Data Sheets	182
4.6 Retrofitting Centrifugal Pumps for Changing Service Conditions	183
4.6.1 Reduced Pipeline Throughput	183
4.6.2 Increased Pipeline Throughput	183
4.6.3 Affinity Laws	184
4.7 Pipeline Hydraulic Requirements	185
4.7.1 System Head Curves and Pump Operating Points	185
4.7.2 Hydraulic Performance in Batched Pipeline Systems with Constant Speed Pumps	188

4.7.3 Hydraulic Performance in Batched Pipeline Systems with Variable Speed Pumps	189
4.7.4 Pump Configurations	190
4.7.4.1 Parallel Operation	190
4.7.4.2 Series Operation	192
4.8 Pump Drivers	192
4.9 Pump Station Design	195
4.9.1 Pump Station Diagram	196
4.9.2 Pump Station Piping	196
4.9.3 Control Valve and Sizing	197
4.9.4 Station Flow Recirculation	198
4.9.5 Pig Launcher and Receiver	199
4.9.6 Pump Station at a Tank Farm	200
4.9.7 Pump Station Heater	201
4.10 Pipeline System Control	202
4.10.1 Pump Station Operation	203
4.10.2 Pump Control Strategy	206
4.10.3 Station Control	207
4.10.3.1 Pump Station Valve Control	207
4.10.4 Injection/Delivery Station Control	208
4.10.5 Pump Unit Control	208
4.10.6 Throttling vs. Speed Controls	209
4.10.6.1 Throttling for Fixed Speed Pumps	210
4.10.6.2 Speed Control for Variable Speed Pumps	211
4.11 Station Electrical Control	213
4.11.1 Station Auxiliary Systems	213
4.11.2 Shutdown Modes	214
4.11.2.1 Emergency Shutdown System	214
4.12 Applicable Codes and Standards	215
References	215

Chapter 5 Pipeline Operation and Batching	217
5.1 Pipeline Operation	217
5.1.1 Pipeline System Operation	217
5.1.2 Concepts of Pipeline Transient Flow	220
5.1.3 Surge Control	228
5.1.3.1 Control Devices	230
5.1.3.2 Pump Unit and Pump Station Operations	231
5.1.3.3 Special Surge Relief Devices	234
5.1.4 Example of Pipeline Operation and Surge Control	236
5.1.4.1 Scheduled Pipeline System Start-Up	238
5.1.4.2 Scheduled Pipeline System Shutdown	240
5.1.4.3 Emergency Shutdown of the Pipeline System	242

5.1.4.4	Batch Operation	242
5.1.5	Transient or Surge Analysis	243
5.2	Liquid Batching Transportation	245
5.2.1	Types of Liquid Pipelines	245
5.2.2	Liquid Hydrocarbon Batching	245
5.2.3	Batched Product Pipeline Growth and Technique	247
5.2.4	Products Batching Definitions and Terms	248
5.2.4.1	Batch Sequencing	249
5.2.4.2	Batch Cycle/Slug	250
5.2.4.3	Buffers	250
5.2.4.4	Batching Travel Time	251
5.2.4.5	Batch Interface Marking and Detection	251
5.2.4.6	Batch Injection, Transportation and Delivery	252
5.2.4.7	Batch Reporting	253
5.2.5	Minimum Batch Size	253
5.2.6	Crude Oil Contamination	254
5.2.6.1	Natural Crude	254
5.2.6.2	Synthetic Crude	254
5.2.6.3	Contamination Level	255
5.2.7	Interface-Volume Estimations	256
5.2.7.1	Batch Calculation and Tracking Example	258
5.2.7.2	Results	259
5.2.8	Batched Products Pipeline Design and Operational Issues	259
5.2.8.1	Design and Operational Issues	260
5.2.8.2	Operation and Control	262
5.2.8.3	Pipeline System Operation/Control	267
5.2.9	Practical Batch Operation in Real-Time	274
5.2.9.1	Batch Launch and Delivery	275
5.2.9.2	Launching and Delivery Operation	276
5.2.9.3	Batch Tracking	276
5.2.10	Multiproduct Pipeline Batch Optimization	278
Addendum to Chapter 5		278
Pipeline System Surge Mitigation Equipment		278
A5.1	Flow Control Valves	279
A5.2	Check Valves	282
A5.3	Relief Valves	286
A5.4	Bursting/Rupture Disc	287
A5.5	Surge Diversion Valve	287
A5.6	Increasing Pipeline Diameter and/or Wall Thickness	288
A5.7	Variable Speed Drives and Soft Starters	288
A5.8	Valve Opening and Closure Times	289
A5.9	Surge Tanks	289
A5.10	Pump Bypass Check Valves	290
A5.11	Applications	290

References	292

Chapter 6 Non-Conventional Hydrocarbon Liquids, Production, and Transportation	295
6.1 Heavy Oil Technology and Transportation	295
6.1.1 Background	295
6.2 Heavy Oil Types and Global Distribution	297
6.3 Heavy Oils Property and Type	299
6.3.1 Types/Grouping	300
6.3.2 Oil Viscosity Prediction	301
6.4 Heavy Oils Transportation Technologies	302
6.4.1 Dilution	303
6.4.2 Upgrading/Partial Upgrading	304
6.4.3 Heating/Thermal Upgrading	305
6.4.4 Water Emulsion	307
6.4.5 Core Annular Flow (CAF)	308
6.4.6 Surfactant/Flow Improvers	309
6.4.7 Slurry Transportation	312
6.4.8 Comparison of Transportation Techniques	312
6.5 Heavy Crudes Properties for Pipeline Transportation	315
6.5.1 Grouping of Crudes and Designations	315
6.5.2 Typical Properties	316
6.6 Heavy Oil Pipeline Transportation Example—Role of Design for Operational Control	317
6.6.1 Summary on Role of Design	317
6.6.2 Need for Transient Analysis	318
6.6.3 Surge Mitigation Methods	320
6.6.4 Code Requirement	321
6.6.5 Case Study—Application to a Heavy Oil Pipeline Projects	322
6.6.5.1 Fluid Properties	323
6.6.5.2 Simulation Model and Data	324
6.6.6 Batch Movement/Transient Simulation Time	327
6.6.7 Simulations Scenarios and Techniques	328
6.6.7.1 Time Steps and Pipe Segment “Knot Spacing”	328
6.6.7.2 Valve Closure and Station Shutdown Timing Sequence	329
6.6.8 Simulation Results	329
6.6.8.1 Effect of Valve Closures	329
6.6.8.2 Effects Due to Pump Stations Shutdown	330
6.6.8.3 Delivery Restriction (Zero Delivery)	332
6.6.8.4 Terminal PCV Closure	332
6.6.8.5 Effect of Minimum Flow Delivery at Maximum Pump Stations Discharge Pressure—Line Packing Conditions	332
6.6.9 Conclusion	333

Addendum to Chapter 6	333
Heavy Oil Resources and Recovery Techniques	333
A6.1 Heavy Oil Resource Base	333
A6.2 Bitumen and Heavy Oils Recovery/Extraction Techniques	336
A6.2.1 Extraction/Recovery Techniques	336
A6.2.2 Production Techniques Scope	339
A6.2.3 Recovery Techniques Summary	342
A6.2.4 Oil Reservoir Classifications	342
References	344

Chapter 7 Liquid Measurement	347
7.1 Introduction	347
7.2 Static Measurement	348
7.2.1 Tank Calibration	348
7.2.1.1 Manual Tank Strapping Method (MTSM)	348
7.2.1.2 Optical Reference Line Method (ORLM)	349
7.2.1.3 Optical Triangulation Method (OTM)	351
7.2.1.4 Electro-Optical Distance Ranging Method (EODRM)	353
7.2.2 Tank Capacity Tables	355
7.2.3 Liquid Calibration of Tanks	355
7.3 Tank Gauging	355
7.3.1 Manual Tank Gauging	355
7.3.2 Servo Tank Gauge	356
7.3.3 Radar Tank Gauge	357
7.3.4 Hybrid Tank Measurement Systems	358
7.3.5 Calculation of Tankage Volumes	359
7.4 Dynamic Measurement	361
7.4.1 Measurement Systems and Characteristics	361
7.4.2 Measurement Uncertainty	362
7.4.2.1 Quality of Liquids	364
7.4.2.2 Device Degradation	364
7.4.2.3 Operational Problems	365
7.4.2.4 Calibration	365
7.4.2.5 Transducer/Transmitter	365
7.4.3 Custody Transfer Requirements	365
7.4.4 Types of Meters	366
7.4.4.1 Positive Displacement Meters	366
7.4.4.2 Turbine Meters	368
7.4.4.3 Ultrasonic Meters	371
7.4.4.4 Coriolis Meters	373
7.4.5 Meter Selection	376
7.4.5.1 Meter Sizing	377
7.4.5.2 Instrumentation and Accessories	377

7.4.5.3 Flow Computers	379
7.4.6 Meter Station Design	380
7.4.6.1 Meter Station Components	381
7.4.6.2 Meter Run	382
7.4.6.3 Meter Provers	384
7.4.7 Prover Types	386
7.4.7.1 Tank Provers	386
7.4.7.2 Conventional Pipe Provers	386
7.4.8 Prover Calibration	390
7.5 Volume Accounting System	392
7.5.1 Ticketing Functions	393
7.5.2 Meter Ticket	394
7.5.3 Tank Ticket	395
7.5.4 Volume Tracking	396
7.5.5 Volume Calculation and Balancing	396
7.5.5.1 Volume Calculations	396
7.5.5.2 Meter Factor and Calibration	396
7.5.6 Determination of Liquid Volume	396
7.5.7 General Equations for Determining Liquid Volumes at Base Conditions	397
7.5.8 Volume Balancing	399
Addendum: Standards Relevant to Liquid Petroleum Measurement	400
A7.1 American Petroleum Institute (API)— www.api.org	400
A7.2 ASTM International (American Standard for Testing Materials)— http://www.astm.org	403
A7.3 American National Standards Institute/ American Society of Mechanical Engineers	403
A7.4 International Organization for Standardization (ISO)— www.iso.org	403
References	405

Chapter 8 Hydrocarbon Petroleum Tankage and Terminal Design	407
8.1 Introduction and Overview	407
8.2 History and Reasons for Use	410
8.3 Products Stored and Properties	412
8.4 Types of Petroleum Storage Tanks	415
8.4.1 Definition and Classifications	415
8.4.2 Types	416
8.4.2.1 Fixed Roof Tanks	416
8.4.2.2 Floating Roof Tanks	419
8.4.3 Emission Control in Storage Tanks	428
8.4.3.1 Tank Rim Sealing Systems: Floating Roof Tanks	428
8.4.4 Tank Fittings and Appurtenances	435

8.5	Petroleum Storage Tanks Standards (For Design, Operation and Protection)	445
8.6	Regulations Affecting Terminal and Storage Facilities	450
8.7	Petroleum Storage/Terminal Design and Construction	452
8.7.1	Typical Layout and Spacing	452
8.7.2	Tank Design (Including Sizing, Materials and Construction)	456
8.7.2.1	Design Data	456
8.7.2.2	Design Calculations	457
8.7.2.3	Tank Material	465
8.7.3	Civil Design	465
8.7.3.1	Tank Foundation	465
8.7.3.2	Types of Foundations	469
8.7.3.3	Bund Walls/Dykes	471
8.7.4	Fabrication and Welding	474
8.7.4.1	Tank Construction—Fabrication and Welding	474
8.7.4.2	Welding Techniques	476
8.7.4.3	Post Weld Heat Treatment of Welded Tanks Structures	482
8.7.4.4	Construction of Spheres	485
8.7.5	Mechanical/ Piping Components and Instrumentation	485
8.7.5.1	Mechanical Appurtenances	485
8.7.5.2	Instrumentation and Controls	486
8.7.6	Tank Venting Emission Calculations	490
8.7.6.1	Total Losses from Fixed Roof Storage Tanks	491
8.7.6.2	Total Losses from Floating Roof Tanks	499
8.7.7	Operational Issues	500
8.7.8	Cathodic Protection of Above Ground Hydrocarbon Storage Tanks	503
8.7.8.1	Definition of Corrosion	503
8.7.8.2	Corrosive Environment	503
8.7.8.3	Consequences of Corrosion	503
8.7.8.4	Types of Corrosion	506
8.7.8.5	Storage Tank Cathodic Protection	510
8.7.8.6	Above Ground Storage Tank CP System	517
8.7.8.7	Typical CP Installation for Above Ground Storage Tanks	519
8.7.8.8	Applicable CP Standards	519
8.8	Tank Failures and Emergency Response	520
8.8.1	Tank Failures	520
8.8.1.1	Past Accidents	523
8.8.1.2	Causes of Tank Failure Hazards	524
8.8.2	Designing Tankage Systems to Minimize Hazards	528
8.8.2.1	Effective Steps	528
8.8.3	Design of a Foam System for Fire Protection of Storage Tanks	537
8.8.3.1	Identifying Flammable Liquid	537

8.8.3.2	Types of Foam Discharge Outlets	538
8.8.3.3	Foam System for Fire Protection of Storage Tanks	538
8.8.3.4	Foam Dam Design for Tanks	543
8.9	Emergency Response Planning and Facilities	543
8.9.1	Planning for the Emergency	544
8.9.2	Responding to Oil Spill Emergencies	544
8.9.3	Tactical Priorities	545
8.9.4	Foam Application	545
8.9.4.1	Foam Supply	546
8.9.4.2	Water Supply	547
8.9.4.3	Exposure Protection	547
