

TABLE OF CONTENTS

1. Introduction to fullerenes and PDT	1
1.1 Introduction to fullerenes and PDT	1
1.2 Fullerenes as PS	3
2. Synthesis of fullerene derivatives	5
2.1 Synthesis of monocationic and polycationic fullerene derivative examples	5
2.2 Synthesis of hexaanionic fullerene derivatives	7
2.3 Synthesis of chromophore-linked fullerene derivatives	9
3. Photochemistry and photophysics of fullereryl molecular micelle and chromophore-fullerene conjugates	10
4. Antimicrobial PDT mediated by fullerenes and their derivatives	12
4.1 Antimicrobial PDT mediated by fullerenes and their derivatives	12
4.2 Fullerenes interaction with cell membrane	14
4.3 Anti-bacterial PDT with fullerenes and derivatives	15
4.4 Anti-fungal PDT with fullerenes and derivatives	22
4.5 Anti-viral PDT with fullerenes and derivatives	23
4.6 Toxicity studies of fullerenes and derivatives	24
5. Anti-cancer PDT	25
5.1 Photodynamic therapy of cancer cells	25
6. In vivo PDT studies with fullerenes	33
6.1 <i>In vivo</i> applications-PDT for infections and tumors	33
7. Conclusions & executive summary	36
7.1 Conclusion & future and perspectives	36
7.2 Executive summary	36
