

CFD TECHNICAL COMMITTEE
Saturday, Nov. 13, 2004
8:00 – 9:10 p.m.
Anaheim, CA

MEETING MINUTES

Number of Members in attendance: 10

Deji Demuren, Chair of the CFDTC, convened the meeting at 8:03 p.m.

1. The minutes of the Committee Meeting at the FEDSM'04 in Charlotte, NC were unanimously approved.
2. FED relationship with IMECE organization
 - a. FED executive committee asked TC's to discuss participation in IMECE, in response to proposal by HTD that divisions in the Basic Engineering Group should either exercise more control in conference organization or separate from IMECE and collocate a conference instead. This was largely fuelled by HTD's dissatisfaction with the arrangements and allocations of their sessions at the IMECE.
 - b. Members did not feel comfortable with separating from IMECE. Prefer the opportunity to interact with other ASME divisions that IMECE offers.
 - c. Some concerns were expressed about revenue sharing and the number of tracks allocated. It was suggested that the Basic Engineering Groups could organize sessions together.
 - d. Members' consensus was to stay in IMECE but to try to exercise more influence on the Tracks/Themes and Programs of the Congress.
3. Sub-Committee on LES Standards
 - a. No feedback.
4. ASME Codes and Standards committee PTC-61
 - a. Urmila Ghia reported that the PTC-61 committee declined to act on the CFDTC motion requesting formal representation. The reason given was that there are already some members of the CFDTC in the committee.
5. The meeting adjourned at 9:10 pm
