Plumbing supply fittings
Legal Notice for Harmonized Standard
Jointly Developed by ASME and CSA

Intellectual property rights and ownership

As between American Society of Mechanical Engineers (“ASME”) and Canadian Standards Association (“CSA”) (collectively “ASME and CSA”) and the users of this document (whether it be in printed or electronic form), ASME and CSA are the joint owners of all works contained herein that are protected by copyright, all trade-marks (except as otherwise noted to the contrary), and all inventions and trade secrets that may be contained in this document, whether or not such inventions and trade secrets are protected by patents and applications for patents. The unauthorized use, modification, copying, or disclosure of this document may violate laws that protect the intellectual property of ASME and CSA and may give rise to a right in ASME and CSA to seek legal redress for such use, modification, copying, or disclosure. ASME and CSA reserve all intellectual property rights in this document.

Disclaimer and exclusion of liability

This document is provided without any representations, warranties, or conditions of any kind, express or implied, including, without limitation, implied warranties or conditions concerning this document’s fitness for a particular purpose or use, its merchantability, or its non-infringement of any third party’s intellectual property rights. ASME and CSA do not warrant the accuracy, completeness, or currency of any of the information published in this document. ASME and CSA make no representations or warranties regarding this document's compliance with any applicable statute, rule, or regulation.

IN NO EVENT SHALL ASME AND CSA, THEIR RESPECTIVE VOLUNTEERS, MEMBERS, SUBSIDIARIES, OR AFFILIATED COMPANIES, OR THEIR EMPLOYEES, DIRECTORS, OR OFFICERS, BE LIABLE FOR ANY DIRECT, INDIRECT, OR INCIDENTAL DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES, HOWSOEVER CAUSED, INCLUDING BUT NOT LIMITED TO SPECIAL OR CONSEQUENTIAL DAMAGES, LOST REVENUE, BUSINESS INTERRUPTION, LOST OR DAMAGED DATA, OR ANY OTHER COMMERCIAL OR ECONOMIC LOSS, WHETHER BASED IN CONTRACT, TORT (INCLUDING NEGLIGENCE), OR ANY OTHER THEORY OF LIABILITY, ARISING OUT OF OR RESULTING FROM ACCESS TO OR POSSESSION OR USE OF THIS DOCUMENT, EVEN IF ASME OR CSA HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES.

In publishing and making this document available, ASME and CSA are not undertaking to render professional or other services for or on behalf of any person or entity or to perform any duty owed by any person or entity to another person or entity. The information in this document is directed to those who have the appropriate degree of experience to use and apply its contents, and ASME and CSA accept no responsibility whatsoever arising in any way from any and all use of or reliance on the information contained in this document.

ASME and CSA have no power, nor do they undertake, to enforce compliance with the contents of the standards or other documents they jointly publish.

Authorized use of this document

This document is being provided by ASME and CSA for informational and non-commercial use only. The user of this document is authorized to do only the following:

If this document is in electronic form:
• load this document onto a computer for the sole purpose of reviewing it;
• search and browse this document; and
• print this document.

Limited copies of this document in print or paper form may be distributed only to persons who are authorized by ASME and CSA to have such copies, and only if this Legal Notice appears on each such copy.

In addition, users may not and may not permit others to
• alter this document in any way or remove this Legal Notice from the attached standard;
• sell this document without authorization from ASME and CSA; or
• make an electronic copy of this document.

If you do not agree with any of the terms and conditions contained in this Legal Notice, you may not load or use this document or make any copies of the contents hereof, and if you do make such copies, you are required to destroy them immediately. Use of this document constitutes your acceptance of the terms and conditions of this Legal Notice.
ASME/CSA Standard

ASME A112.18.1-2011/CSA B125.1-11

Plumbing supply fittings

*Registered trade-mark of Canadian Standards Association
Commitment for Amendments

This Standard is issued jointly by the American Society of Mechanical Engineers (ASME) and the Canadian Standards Association (CSA). Amendments to this Standard will be made only after processing according to the Standards writing procedures of both ASME and CSA.

Preface  xiv

1 Scope  1

2 Reference publications  2

3 Definitions and abbreviations  3
  3.1 Definitions  3
  3.2 Abbreviations  7

4 Design requirements  7
  4.1 Supply fittings  7
  4.1.1 Rated pressure  7
  4.1.2 Rated temperatures  8
  4.1.3 Seating members  8
  4.2 Servicing  8
  4.3 Installation  8
  4.4 Threaded connections  8
  4.5 Connections other than threaded connections  9
  4.6 Accessible designs  10
  4.7 Backflow prevention  10
  4.8 Cover plates and escutcheons  10
  4.9 Toxicity  10
  4.10 Frost-proof faucets and hydrants  10
  4.11 Shower heads, body sprays, and hand-held showers  10
  4.11.1 General  10
  4.11.2 High-efficiency shower heads and hand-held showers  11
  4.12 Cross-flow  11
  4.13 Fittings incorporating electrical features  11
  4.13.1 General  11
  4.13.2 Testing  11
  4.14 Materials  12
  4.15 Automatic compensating valve temperature control  12
  4.16 Lawn faucets  12
  4.17 Flexible water connectors  12

5 Performance requirements and test procedures  12
  5.1 General  12
  5.1.1 Preconditioning  12
  5.1.2 Installation for testing  12
  5.1.3 Test conditions  12
  5.1.4 Order of tests  12
  5.2 Coatings  12
5.2.1 General 12
5.2.2 Corrosion (all substrates and coatings) 13
5.2.3 Adhesion 13
5.2.4 Decorative organic coatings 14
5.3 Pressure and temperature 15
5.3.1 Static and dynamic seals 15
5.3.2 Burst pressure 15
5.3.3 Cross-flow check valves 16
5.3.4 Hose assemblies 16
5.3.5 Ball joints 16
5.3.6 Diverters 17
5.3.7 Aerators and other end point devices 17
5.4 Flow rate 17
5.4.1 Supply fittings 17
5.4.2 Test procedure 17
5.5 Operating requirements 18
5.6 Life cycle 19
5.6.1 Performance requirements 19
5.6.2 Test procedures 20
5.6.3 Fittings and other control devices 21
5.7 Resistance to installation loading 23
5.7.1 Bending strength 23
5.7.2 Thread torque strength 24
5.8 Resistance to use loading 24
5.8.1 Operating controls 24
5.8.2 Maintenance of installed position 24
5.8.3 Swing spout strength 24
5.9 Backflow prevention 25
5.9.1 General 25
5.9.2 Fittings with plain outlets 25
5.9.3 Fittings with submersible outlets 26
5.10 Automatic compensating valves 29
5.10.1 General 29
5.10.2 High-temperature conditioning test 29
5.10.3 Pressure and burst pressure test 29
5.10.4 Maximum torque or force adjustment 29
5.10.5 Life cycle test 30
5.10.6 Temperature control 30
5.10.7 Supply line pressure loss 33
5.10.8 Temperature and high limit control 33
5.11 Lawn faucets 34
5.11.1 Performance requirements 34
5.11.2 Test procedure 34
5.12 Alternative materials test 34
5.12.1 Performance requirements 34
5.12.2 Test procedure 34
5.13 High-efficiency shower heads and hand-held showers 35
5.13.1 General 35
5.13.2 Flow rate 35
5.13.3 Spray force 35
5.13.4 Spray coverage 36

6 Markings, packaging, and installation instructions 37
6.1 General 37
6.2 Temperature identification 38
6.3 Packaging 38
6.4 Instructions for automatic compensating valves 38
6.5 High-efficiency shower heads and hand-held showers 38

Annexes
A (informative) — Unit conversion and rounding criteria 53
B (normative) — Tests by fitting type 54
C (informative) — Verifying the time constant of the temperature-measuring equipment 56
D (informative) — Temperature variation for pressure-balancing and thermostatic compensating valves 58

Tables
1 — Minimum and maximum flow rates 39
2 — Operating requirements 40
3 — Life cycle test 40
4 — Thread torque strength 41

Figures
1 — Deck-mounted lavatory and sink supply fittings 41
2 — Dimensions for 1/2-14 NPSM shanks 42
3 — Discharge capacity test schematics 43
4 — Bending loads on supply fittings 44
5 — Set-up for back siphonage and hidden check valve test 45
6 — Set-up for check valve leakage test 46
7 — Set-up for high-temperature conditioning, regulation and temperature variation, and cold water supply pressure loss tests 47
8 — Set-up for life cycle test for automatic compensating valves 47
9 — Spray force-balance test fixture 48
10 — Spray force test fixture setup 49
11 — Spray coverage test fixture 50
12 — Spray coverage test fixture setup ring 51
13 — Spray coverage test fixture setup 52
