Steam Turbines in Combined Cycles

Performance Test Codes
This Code will be revised when the Society approves the issuance of a new edition.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this Code. Periodically certain actions of the ASME PTC Committee may be published as Code Cases. Code Cases and interpretations are published on the ASME Web site under the Committee Pages at http://cstools.asme.org as they are issued.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not “approve,” “rate,” or “endorse” any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assumes any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form, in an electronic retrieval system or otherwise, without the prior written permission of the publisher.

## CONTENTS

Notice ........................................................................................................................................................................... v
Foreword ........................................................................................................................................................................... vi
Committee Roster ............................................................................................................................................................ vii
Correspondence With the PTC Committee ................................................................................................................... viii

### Section 1 Object and Scope
  1-1 Object ................................................................................................................................................................. 1
  1-2 Scope ..................................................................................................................................................................... 1
  1-3 Uncertainty ............................................................................................................................................................. 1

### Section 2 Definitions and Descriptions of Terms
  2-1 Symbols ................................................................................................................................................................. 2
  2-2 Abbreviations .......................................................................................................................................................... 2
  2-3 Definitions .............................................................................................................................................................. 2

### Section 3 Guiding Principles
  3-1 Introduction .......................................................................................................................................................... 4
  3-2 Test Plan ................................................................................................................................................................. 6
  3-3 Preliminary Testing ............................................................................................................................................ 9
  3-4 Isolation of the Cycle ....................................................................................................................................... 9
  3-5 Conduct of Test ................................................................................................................................................. 10
  3-6 Calculation and Reporting of Results ............................................................................................................. 13

### Section 4 Instruments and Methods of Measurement
  4-1 General Requirements ........................................................................................................................................ 17
  4-2 Pressure Measurement .................................................................................................................................. 22
  4-3 Temperature Measurement ............................................................................................................................. 26
  4-4 Flow Measurement ........................................................................................................................................ 29
  4-5 Electrical Generation Measurement ............................................................................................................. 32
  4-6 Data Collection and Handling ........................................................................................................................ 37

### Section 5 Computation of Results
  5-1 Fundamental Equation ...................................................................................................................................... 39
  5-2 Data Reduction .................................................................................................................................................... 39
  5-3 Correction of Test Results to Specified Conditions ..................................................................................... 39
  5-4 Uncertainty Analysis ....................................................................................................................................... 48

### Section 6 Report of Results
  6-1 General Requirements ....................................................................................................................................... 50
  6-2 Executive Summary ........................................................................................................................................ 50
  6-3 Introduction ........................................................................................................................................................ 50
  6-4 Calculations and Results ................................................................................................................................. 50
  6-5 Instrumentation ................................................................................................................................................ 50
  6-6 Conclusion ......................................................................................................................................................... 51
  6-7 Appendices ......................................................................................................................................................... 51

### Figures
  3-1.2-1 Three-Pressure Reheat Steam Turbine Heat Balance ...................................................................................... 5
  3-1.2-2 Two-Pressure Nonreheat Steam Turbine Heat Balance ..................................................................................... 6
  3-1.3.2 Net Turbine Equipment Electrical Output .................................................................................................. 7
  3-5.5.1 Required Number of Readings .................................................................................................................. 13
  3-5.5.3 Uncertainty Intervals .................................................................................................................................. 14
  4-1.2.3-1 Location and Type of Test Instrumentation for Combined Cycle (Triple Pressure HP/IP-LP Reheat Steam Turbine) Test Procedure ................................................................................................. 19
