**AN AMERICAN NATIONAL STANDARD**

**The American Society of  
Mechanical Engineers**

**Three Park Avenue • New York, NY • 10016 USA**

Date of Issuance: April 28, 2011

This Standard will be revised when the Society approves the issuance of a new edition. This Standard will become effective 6 months after the Date of Issuance. There will be no addenda issued to this edition.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this document. Interpretations are published on the ASME Web site under the Committee Pages at <http://cstools.asme.org> as they are issued.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not “approve,” “rate,” or “endorse” any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assumes any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,  
in an electronic retrieval system or otherwise,  
without the prior written permission of the publisher.

# CONTENTS

Foreword .....		iv
Preparation of Technical Inquiries .....		v
Committee Roster .....		vi
Summary of Changes .....		vii
<b>Part 1</b>	<b>Scope, Organization, and Intent .....</b>	<b>1</b>
<b>Part 2</b>	<b>Welded Repairs .....</b>	<b>5</b>
Article 2.1	Butt-Welded Insert Plates in Pressure Components .....	5
Article 2.2	External Weld Overlay to Repair Internal Thinning .....	11
Article 2.3	Seal-Welded Threaded Connections and Seal Weld Repairs .....	17
Article 2.4	Welded Leak Box Repair .....	19
Article 2.5	Welded Lip Seals (in the course of preparation) .....	23
Article 2.6	Full Encirclement Steel Reinforcing Sleeves for Piping .....	24
Article 2.7	Fillet Welded Patches With Reinforcing Plug Welds .....	31
Article 2.8	Alternatives to Traditional Welding Preheat .....	37
Article 2.9	Alternatives to Postweld Heat Treatment .....	42
Article 2.10	In-Service Welding Onto Carbon Steel Pressure Components or Pipelines .....	45
Article 2.11	Weld Buildup, Weld Overlay, and Clad Restoration .....	57
Article 2.12	Fillet Welded Patches .....	63
Article 2.13	Threaded or Welded Plug Repairs .....	68
Article 2.14	Field Heat Treating of Vessels .....	71
<b>Part 3</b>	<b>Mechanical Repairs .....</b>	<b>79</b>
Article 3.1	Replacement of Pressure Components .....	79
Article 3.2	Freeze Plugs .....	81
Article 3.3	Damaged Threads in Tapped Holes .....	86
Article 3.4	Flaw Excavation and Weld Repair .....	96
Article 3.5	Flange Repair and Conversion .....	102
Article 3.6	Mechanical Clamp Repair .....	105
Article 3.7	Pipe Straightening or Alignment Bending .....	109
Article 3.8	Damaged Anchors in Concrete (Postinstalled Mechanical Anchors) .....	112
Article 3.9	Valves With Pressure-Seal-Type Bonnets (in the course of preparation) .....	121
Article 3.10	Hot Bolting (in the course of preparation) .....	122
Article 3.11	Hot and Half Bolting Removal Procedures .....	123
Article 3.12	Inspection and Repair of Shell and Tube Heat Exchangers .....	127
<b>Part 4</b>	<b>Nonmetallic and Bonded Repairs .....</b>	<b>139</b>
Article 4.1	Nonmetallic Composite Repair Systems: High-Risk Applications .....	139
Article 4.2	Nonmetallic Composite Repair Systems: Low-Risk Applications .....	171
Article 4.3	Nonmetallic Internal Lining for Pipe: Sprayed Form for Buried Pipe .....	185
<b>Part 5</b>	<b>Examination and Testing .....</b>	<b>197</b>
Article 5.1	Pressure and Tightness Testing of Piping and Equipment .....	197
Article 5.2	Nondestructive Examination in Lieu of Pressure Testing for Repairs and Alterations .....	211
