ASME
SETTING THE STANDARD

Date of Issuance: September 30, 2009

The next edition of this Standard is scheduled for publication in 2012. There will be no addenda issued to this edition.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this Standard. Interpretations are published on the ASME Web site under the Committee Pages at <http://cstools.asme.org> as they are issued.

Items approved as errata to this edition are published on the ASME Web site under the Committee Pages at <http://cstools.asme.org>.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not “approve,” “rate,” or “endorse” any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assume any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,
in an electronic retrieval system or otherwise,
without the prior written permission of the publisher.

CONTENTS

Foreword	v
Committee Roster	vii
Correspondence With the B16 Committee	viii
Introduction	ix
1 Scope	1
2 Pressure–Temperature Ratings	2
3 Nominal Pipe Size	4
4 Marking	4
5 Materials	5
6 Dimensions	6
7 Pressure Testing	10
8 Requirements for Special Class Valves	11
Figures	
1 Method of Designating Location of Auxiliary Connections When Specified	14
2 Thread Length for Auxiliary Connections	15
3 Socket Welding for Auxiliary Connections	15
4 Butt Welding for Auxiliary Connections	15
5 Bosses for Auxiliary Connections	16
6 Gate Body (Pressure Seal Bonnet)	16
7 Y Pattern Globe Body (Pressure Seal Bonnet)	17
8 Angle Body (Pressure Seal Bonnet): Bonnet Same as Y Pattern Globe	17
9 Elbow Down (Pressure Seal Bonnet)	18
10 Gate Body (Flanged Bonnet)	18
11 Globe Body (Flanged Bonnet)	19
12 Butterfly Body	19
13 Plug Body	20
14 Conduit Gate Body (Pressure Seal Bonnet)	20
15 Dished Cover	21
16 Flat Cover	21
17 Butterfly Valve Body	22
Tables	
1 Material Specification List: Applicable ASTM Specification	23
2 Pressure–Temperature Ratings	28
3 Valve Body Minimum Wall Thickness, t_m , mm (in.)	95
4 Minimum Wall Thickness for Socket Welding and Threaded Ends	101
Mandatory Appendices	
I Radiography Examination: Procedure and Acceptance Standards	103
II Magnetic Particle Examination: Procedure and Acceptance Standards	105
III Liquid Penetrant Examination: Procedure and Acceptance Standards	106
IV Ultrasonic Examination: Procedure and Acceptance Standards	107
V Requirements for Limited Class Valves	108
VI Basis Equations for Minimum Wall Thickness	111
VII Pressure–Temperature Ratings: U.S. Customary Units	113
VIII Reference Standards and Specifications	179

Nonmandatory Appendices

A	Relationship Between Nominal Pipe Size and Inside Diameter	182
B	Method Used for Establishing Pressure–Temperature Ratings	184
C	Quality System Program	191
