Gas Transmission and Distribution Piping Systems

ASME Code for Pressure Piping, B31
Gas Transmission and Distribution Piping Systems

ASME Code for Pressure Piping, B31
The next edition of this Code is scheduled for publication in 2012. There will be no addenda issued to this edition.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this Code. The interpretations will be included with this edition. Interpretations are published on the ASME Web site under the Committee Pages at http://cstools.asme.org as they are issued.

Chapter VIII
Offshore Gas Transmission
A800 Offshore Gas Transmission ........................................... 98
A801 General ........................................................................ 98
A802 Scope and Intent ............................................................ 98
A803 Offshore Gas Transmission Terms and Definitions ........ 98
A811 Qualification of Materials and Equipment ................. 99
A814 Material Specifications .................................................. 99
A817 Conditions for the Reuse and Requalification of Pipe ... 100
A820 Welding Offshore Pipelines ........................................... 100
A821 General ........................................................................ 100
A823 Qualification of Procedures and Welders .................. 100
A825 Stress Relieving ............................................................. 100
A826 Inspection of Welds ....................................................... 101
A830 Piping System Components and Fabrication Details .... 101
A831 Piping System Components ............................................ 101
A832 Expansion and Flexibility .............................................. 101
A834 Supports and Anchorage for Exposed Piping ............... 101
A835 Anchorage for Buried Piping ......................................... 101
A840 Design, Installation, and Testing ................................. 101
A841 Design Considerations .................................................. 102
A842 Strength Considerations ............................................... 103
A843 Compressor Stations ...................................................... 106
A844 On-Bottom Stability ...................................................... 106
A846 Valves ........................................................................ 107
A847 Testing ....................................................................... 108
A850 Operating and Maintenance Procedures Affecting the
Safety of Gas Transmission Facilities ................................. 108
A851 Pipeline Maintenance .................................................. 109
A854 Location Class ............................................................. 110
A860 Corrosion Control of Offshore Pipelines ....................... 110
A861 External Corrosion Control .......................................... 110
A862 Cathodic Protection Criteria ........................................ 111
A864 Internal Corrosion Control ............................................ 112
Table A842.2.2-1  Design Factors for Offshore Pipelines, Platform Piping, and Pipeline Risers ................. 104

Chapter IX  Sour Gas Service
B800  Sour Gas Service ........................................ 113
B801  General ................................................. 113
B802  Scope and Intent ....................................... 113
B803  Sour Gas Terms and Definitions ...................... 113
B813  Marking ................................................ 114
B814  Material Specifications ................................ 114
B820  Welding Sour Gas Pipelines ........................... 114
B821  General ................................................. 114
B822  Preparation for Welding ................................ 114
B823  Qualification of Procedures and Welders ............. 114
B824  Preheating ............................................. 114
B825  Stress Relieving ....................................... 115
B826  Welding and Inspection Tests .......................... 115
B830  Piping System Components and Fabrication Details .... 115
B831  Piping System Components ................................ 115
B840  Design, Installation, and Testing ...................... 115
B841  Steel Pipe ............................................. 115
B842  Other Materials ........................................ 116
B843  Compressor Stations ..................................... 116
B844  Pipe-Type and Bottle-Type Holders ....................... 116
B850  Additional Operating and Maintenance Considerations Affecting the Safety of Sour Gas Pipelines .......... 116
B851  Pipeline Maintenance ...................................... 117
B854  Location Class and Changes in Number of Buildings Intended for Human Occupancy .................... 118
B860  Corrosion Control of Sour Gas Pipelines .............. 118
B861  External Corrosion Control for Steel Pipelines .......... 118
B864  Internal Corrosion Control .............................. 118
B867  Stress Corrosion and Other Phenomena .................. 119

Tables
B850.1-1  100-ppm ROE ........................................... 117
B850.1-2  500-ppm ROE ........................................... 117
B850.1-3  Metric Example for 100-ppm ROE .................... 117
B850.1-4  Metric Example for 500-ppm ROE .................... 118

Appendices
Mandatory Appendix A  References .............................................. 121
Mandatory Appendix B  Numbers and Subjects of Standards and Specifications That Appear in Mandatory Appendix A .............................................. 124
Nonmandatory Appendix C  Publications That Do Not Appear in the Code or Mandatory Appendix A .............................................. 125
Mandatory Appendix D  Specified Minimum Yield Strength for Steel Pipe Commonly Used in Piping Systems .................. 128
Mandatory Appendix E  Flexibility and Stress Intensification Factors .................. 130
Mandatory Appendix F  Extruded Headers and Welded Branch Connections ............ 136
Mandatory Appendix G  Testing of Welders Limited to Work on Lines Operating at Hoop Stresses of Less Than 20% of the Specified Minimum Yield Strength .................. 144
Mandatory Appendix H  Flattening Test for Pipe .................. 145
Mandatory Appendix I  End Preparations for Buttwelding .......................... 146
Nonmandatory Appendix J  Commonly Used Conversion Factors .................. 155
