(Revision of ASME PTC 19.1-2005)

Test Uncertainty

Performance Test Codes

AN AMERICAN NATIONAL STANDARD

The American Society of Mechanical Engineers
Two Park Avenue • New York, NY • 10016 USA

Date of Issuance: May 30, 2014

This Code will be revised when the Society approves the issuance of a new edition.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this Code. Interpretations are published on the Committee Web page under go.asme.org/InterpsDatabase. Periodically certain actions of the ASME PTC Committee may be published as Cases. Cases are published on the ASME Web site under the PTC Committee Pages at go.asme.org/PTCcommittee as they are issued.

Errata to codes and standards may be posted on the ASME Web site under the Committee Pages to provide corrections to incorrectly published items, or to correct typographical or grammatical errors in codes and standards. Such errata shall be used on the date posted.

The PTC Committee Page can be found at go.asme.org/PTCcommittee. There is an option available to automatically receive an e-mail notification when errata are posted to a particular code or standard. This option can be found on the appropriate Committee Page after selecting "Errata" in the "Publication Information" section.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not "approve," "rate," or "endorse" any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assumes any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,
in an electronic retrieval system or otherwise,
without the prior written permission of the publisher.

CONTENTS

Notice vi
Foreword vii
Committee Roster viii
Correspondence With the PTC Committee ix

Section 1 Introduction 1
1-1 General 1
1-2 Uncertainty Classifications 1
1-3 Advantages of Using This Code 1
1-4 Applications 1
1-5 Disclaimer 2

Section 2 Object and Scope 3
2-1 Object 3
2-2 Scope 3

Section 3 Nomenclature and Glossary 4
3-1 Nomenclature 4
3-2 Glossary 4

Section 4 Fundamental Concepts 6
4-1 Assumptions 6
4-2 Measurement Error 6
4-3 Measurement Uncertainty 6
4-4 Pretest and Post-Test Uncertainty Analyses 11

Section 5 Defining the Measurement Process 13
5-1 Overview 13
5-2 Selection of the Appropriate "True Value" 13
5-3 Identification of Error Sources 13
5-4 Categorization of Uncertainties 14
5-5 Comparative Testing 15

Section 6 Uncertainty of a Measurement 17
6-1 Random Standard Uncertainty of the Mean 17
6-2 Systematic Standard Uncertainty of a Measurement 18
6-3 Classification of Uncertainty Sources 18
6-4 Combined Standard and Expanded Uncertainty of a Measurement 19

Section 7 Uncertainty of a Result 21
7-1 Propagation of Measurement Uncertainties Into a Result 21
7-2 Sensitivity 21
7-3 Random Standard Uncertainty of a Result 22
7-4 Systematic Standard Uncertainty of a Result 22
7-5 Combined Standard Uncertainty and Expanded Uncertainty of a Result 23

Section 8 Additional Uncertainty Considerations 24
8-1 Correlated Errors 24
8-2 Nonsymmetric Systematic Uncertainty 28
8-3 Fossilization of Calibrations 32
8-4 Spatial Variations 33
8-5 Analysis of Redundant Means 34
8-6 Regression Uncertainty 35
8-7 Simplified Uncertainty Analysis for Calibrations 37

Section 9 **Step-by-Step Calculation Procedure** 40
9-1 General Considerations 40
9-2 Calculation Procedure 40

Section 10 **Examples** 42
10-1 Combined Cycle Performance Uncertainty 42
10-2 Taylor Series Propagation for Random Errors That Are Not Independent 52
10-3 Flow Measurement Using Pitot Tubes 54
10-4 Post-Test Uncertainty Analysis Example: HRSG High Pressure Steam Flow 59
10-5 Humidity Measurement 62
10-6 Periodic Comparative Testing 71

Section 11 **References** 79

Section 12 **Additional References** 81

Figures

4-2-1 Illustration of Measurement Errors 7
4-2-2 Measurement Error Components 7
4-3.1-1 Population Distribution 8
4-3.3-1 Uncertainty Interval 12
5-3.1-1 Generic Measurement Calibration Hierarchy 14
5-4.3-1 "Within" and "Between" Sources of Data Scatter 16
8-2.1-1 Gaussian Distribution for Nonsymmetric Systematic Errors 29
8-2.1-2 Rectangular Distribution for Nonsymmetric Systematic Errors 29
8-2.1-3 Triangular Distribution for Nonsymmetric Systematic Errors 29
8-2.1-4 Triangular Distribution of Temperatures 31
8-5-1 Three Cases of Redundant Means 34
10-1.1-1 Train Thermal Performance Test 43
10-3.1-1 Four Circumferential and Ten Radial Traverse Locations 55
10-5.1-1 Schematic of Moisture Absorption and Removal System 67
10-5.3.3-1 Example for Estimating Sensitivity From a Chart 70
10-6.1-1 Installed Arrangement 72
10-6.1-2 Pump Design Curve With Factory and Field Test Data Shown 73
10-6.1-3 Comparison of Test Results With Independent Control Conditions 73
10-6.2-1 Comparison of Test Results Using the Initial Field Test as the Control 77

Tables

6-4.1-1 Circulating Water-Bath Temperature Measurements 20
6-4.1-2 Systematic Standard Uncertainty of Average Circulating Water-Bath Temperature Measurement 20
8-1 Burst Pressures 25
8-2.1-1 Expressions for q for the Gaussian, Rectangular, and Triangular Distributions in Figs. 8-2.1-1 Through 8-2.1-3 29
8-2.1-2 Systematic Standard Uncertainties, $b_{\bar{X}_{ns'}}$ for the Gaussian, Rectangular, and Triangular Distributions in Figs. 8-2.1-1 Through 8-2.1-3 30
8-6.4.5-1 Systematic Standard Uncertainty Components for $\hat{Y}$ Determined From Regression Equation 37
9-2-1 Table of Data, Independent Parameters 41
9-2-2 Summary of Data, Calculated Result 41
10-1.6-1 Combined Cycle Net Facility Electrical Output Uncertainty Including the Correlated Uncertainties 48
10-1.6-2 Combined Cycle Net Facility Heat Rate Uncertainty Including the Correlated Uncertainties 49
10-1.6-3 Combined Cycle Net Facility Electrical Output Uncertainty Excluding the Correlated Uncertainties 50
10-1.6-4 Combined Cycle Net Facility Heat Rate Uncertainty Excluding the Correlated Uncertainties 51

10-2.2-1 Test Pressure Data for an Orifice Measuring Flow in a Pipe 52
10-2.5-1 Individual Delta Pressure Measurements 54
10-3.2-1 Average Values at Each Traverse Circumferential and Radial Location 56
10-3.3-1 Standard Deviations at Each Traverse Circumferential and Radial Location 56
10-3.3-2 Summarized Average Circumferential Velocities and Grand Average Velocity 56
10-3.6-1 Random Standard Uncertainty for Both Average Circumferential Velocities and Grand Average Velocity 57
10-3.7.1-1 Systematic Standard Uncertainty for Average Circumferential Velocities 58
10-3.7.1-2 Systematic Standard Uncertainty Due to Instrumentation Sources for Grand Average Circumferential Velocities 58
10-3.9-1 Components of Uncertainty in the Grand Average Pipe Velocity 60
10-4.3.2-1 Identification of Parameters 61
10-4.3.3-1 Calculated Sensitivities of Each Parameter 63
10-4.4-1 Random Standard Uncertainty Estimated for Each Parameter 64
10-4.5-1 Systematic Standard Uncertainty Estimated for Each Parameter 65
10-4.5-2 Identified Elemental Uncertainty Components and Values That Are Assumed to Be the Same for Each Parameter 65
10-4.5-3 Combined Standard Uncertainty and Expanded Uncertainty of the Result 66
10-5.2-1 Measured Values and Statistical Properties 68
10-5.4-1 Estimated Values, Standard Uncertainties, and Calculated Sensitivities 70
10-5.5-1 Standard Uncertainties, Combined Standard Uncertainty, and Expanded Uncertainty of the Result 72
10-6.1-1 Pump Design Data (T_c = 20°C) 72
10-6.1-2 Summary of Test Results 72
10-6.2-1 Uncertainty Propagation for Comparison With Independent Control 76
10-6.2-2 Summary Uncertainties 76
10-6.2-3 Summary of Results for Each Test 76
10-6.3-1 Uncertainty Propagation for Comparative Uncertainty Analysis 77
10-6.3-2 Correlated Terms for Comparative Uncertainty Analysis 78

Nonmandatory Appendices

A Statistical Considerations 83
B Guidelines for Degree of Freedom and Confidence Intervals 93
C Propagation of Uncertainty Through Taylor Series 95
D The Central Limit Theorem 99
E General Regression Uncertainty 100
