

ASME B30.9-2014
(Revision of ASME B30.9-2010)

Slings

**Safety Standard for Cableways, Cranes,
Derricks, Hoists, Hooks, Jacks, and Slings**

AN AMERICAN NATIONAL STANDARD

**The American Society of
Mechanical Engineers**

ASME B30.9-2014
(Revision of ASME B30.9-2010)

Slings

**Safety Standard for Cableways, Cranes,
Derricks, Hoists, Hooks, Jacks, and Slings**

AN AMERICAN NATIONAL STANDARD

**The American Society of
Mechanical Engineers**

Two Park Avenue • New York, NY • 10016 USA

Date of Issuance: February 6, 2015

The next edition of this Standard is scheduled for publication in 2017. This Standard will become effective 1 year after the Date of Issuance.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this Standard. Interpretations are published on the ASME Web site under the Committee Pages at <http://cstools.asme.org/> as they are issued. Interpretations will also be included with each edition.

Errata to codes and standards may be posted on the ASME Web site under the Committee Pages to provide corrections to incorrectly published items, or to correct typographical or grammatical errors in codes and standards. Such errata shall be used on the date posted.

The Committee Pages can be found at <http://cstools.asme.org/>. There is an option available to automatically receive an e-mail notification when errata are posted to a particular code or standard. This option can be found on the appropriate Committee Page after selecting “Errata” in the “Publication Information” section.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not “approve,” “rate,” or “endorse” any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assumes any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,
in an electronic retrieval system or otherwise,
without the prior written permission of the publisher.

CONTENTS

Foreword	vi
Committee Roster	viii
B30 Standard Introduction	x
Summary of Changes	xiii
Chapter 9-0	Scope, Definitions, Personnel Competence, Translations, and
	References
Section 9-0.1	Scope of ASME B30.9
Section 9-0.2	Definitions
Section 9-0.3	Personnel Competence
Section 9-0.4	Translations
Section 9-0.5	References
Chapter 9-1	Alloy Steel Chain Slings: Selection, Use, and Maintenance
Section 9-1.0	Scope
Section 9-1.1	Training
Section 9-1.2	Components
Section 9-1.3	Fabrication and Configurations
Section 9-1.4	Design Factor
Section 9-1.5	Rated Load
Section 9-1.6	Proof Test Requirements
Section 9-1.7	Sling Identification
Section 9-1.8	Effects of Environment
Section 9-1.9	Inspection, Removal, and Repair
Section 9-1.10	Operating Practices
Chapter 9-2	Wire Rope Slings: Selection, Use, and Maintenance
Section 9-2.0	Scope
Section 9-2.1	Training
Section 9-2.2	Components
Section 9-2.3	Fabrication and Configurations
Section 9-2.4	Design Factor
Section 9-2.5	Rated Load
Section 9-2.6	Proof Test Requirements
Section 9-2.7	Sling Identification
Section 9-2.8	Effects of Environment
Section 9-2.9	Inspection, Removal, and Repair
Section 9-2.10	Operating Practices
Chapter 9-3	Metal Mesh Slings: Selection, Use, and Maintenance
Section 9-3.0	Scope
Section 9-3.1	Training
Section 9-3.2	Components
Section 9-3.3	Fabrication and Configurations
Section 9-3.4	Design Factor
Section 9-3.5	Rated Load
Section 9-3.6	Proof Test Requirements
Section 9-3.7	Sling Identification
Section 9-3.8	Effects of Environment
Section 9-3.9	Inspection, Removal, and Repair
Section 9-3.10	Operating Practices

Chapter 9-4	Synthetic Rope Slings: Selection, Use, and Maintenance	22
Section 9-4.0	Scope	22
Section 9-4.1	Training	23
Section 9-4.2	Components	23
Section 9-4.3	Fabrication and Configurations	23
Section 9-4.4	Design Factor	24
Section 9-4.5	Rated Load	24
Section 9-4.6	Proof Test Requirements	24
Section 9-4.7	Sling Identification	26
Section 9-4.8	Effects of Environment	26
Section 9-4.9	Inspection, Removal, and Repair	26
Section 9-4.10	Operating Practices	27
Chapter 9-5	Synthetic Webbing Slings: Selection, Use, and Maintenance	30
Section 9-5.0	Scope	30
Section 9-5.1	Training	30
Section 9-5.2	Components	30
Section 9-5.3	Fabrication and Configurations	30
Section 9-5.4	Design Factor	30
Section 9-5.5	Rated Load	30
Section 9-5.6	Proof Test Requirements	30
Section 9-5.7	Sling Identification	33
Section 9-5.8	Effects of Environment	33
Section 9-5.9	Inspection, Removal, and Repair	33
Section 9-5.10	Operating Practices	34
Chapter 9-6	Polyester Roundslings: Selection, Use, and Maintenance	36
Section 9-6.0	Scope	36
Section 9-6.1	Training	36
Section 9-6.2	Components	36
Section 9-6.3	Fabrication and Configurations	36
Section 9-6.4	Design Factor	36
Section 9-6.5	Rated Load	36
Section 9-6.6	Proof Test Requirements	36
Section 9-6.7	Sling Identification	38
