## Nomenclature

xv

### Chapter 1 Introduction

1. Drillstrings
   1.1 Drill Pipe
   1.2 Static Analysis
      1.2.1 Neutral Point
      1.2.2 Drill Collar Buckling
      1.2.3 Stabilized Drill Collars
      1.2.4 Drill Pipe Buckling
   1.3 Dynamic Analysis
      1.3.1 Drillstring Vibrations
      1.3.2 Downhole Measurements of Drill Bit Forces and Motion
   1.4 Directional Drilling
      1.4.1 Stabilized Bottom Hole Assemblies
      1.4.2 Directional Control Using Downhole Motors
         1.4.2.1 Positive Displacement Motors (PDM)
         1.4.2.2 Downhole Drilling Turbines
   1.5 Marine Drilling And Production Risers
      1.5.1 Hydrodynamic Forces on Cylinders
      1.5.2 Vortex Shedding
      1.5.3 Boundary Conditions
      1.5.4 Marine Risers Response Prediction

1
iv • Table of Contents

1.5.4.1 Closed Form Method of Solutions 22
1.5.4.2 Riser Displacement due to Rig Offset 23

1.5.5 Dynamic Response 26

1.6 Maturity of Drilling and Production Technology 26

References 27

Chapter 2 Mechanics of Long Beam Columns 31

2.1 Buckling Due to Weight of Vertical Column 31

2.2 Oscillation of a Hanging Chain 34
   2.2.1 Natural Frequency of a Freely Hanging Chain 34
   2.2.2 Natural Frequencies of a Hanging Chain Constrained at the Lower End 36

2.3 Short Beams Under Uniform Tension 38
   2.3.1 Constant Inside and Outside Pressure with Uniform Tension 39
   2.3.2 Static Analysis of Short Pipe 41
      2.3.2.1 Buckling of Short Pipe 41
      2.3.2.2 Buckling from Internal Pressure 43
      2.3.2.3 Uniformly Distributed Side Load 43
      2.3.2.4 Non-Uniformly Distributed Side Load 48
   2.3.3 Dynamic Analysis of Short Pipe 49
      2.3.3.1 Natural Frequencies and Mode Shapes 49
      2.3.3.2 Instability of Rotating Shafts with End Loads 50
      2.3.3.3 Modal Analysis of Short Pipe 52

2.4 Bending Equation for Long Beam-Columns 53
   2.4.1 Hydrostatic Effects of Surrounding Fluids of Equal Density 53
   2.4.2 Hydrostatic Effects of Surrounding Fluids of Different Densities 54
   2.4.3 Unique Features of the Differential Equation of Bending 54

Chapter 3  Drillinstring Mechanics  105

3.1 Buckling and Lateral Vibrations of Drill Pipe  105
   3.1.1 Differential Equation of Bending  105
   3.1.2 Method of Solution  108
   3.1.3 Use of Buckling Solution  109
   3.1.4 Natural Frequencies of Drill Pipe (Lateral Modes)  112

3.2 Buckling of Drill Collars  116
   3.2.1 Bending Equation  116
   3.2.2 Lubinski’s Solution  117
   3.2.3 Helical Buckling Within Well Bore or Casing  122

3.3 Stabilizer Placement Analysis  123
   3.3.1 Method of Solution  123
   3.3.2 Example Calculation  128

3.4 Buckling on an Inclined Plane  130
   3.4.1 Buckling of Drillstrings in Directional Wells  131

3.5 Drill Collar Dynamics  131
   3.5.1 Whirling Motion in Drill Collars  131
      3.5.1.1 Differential Equations of Motion  132
      3.5.1.2 Effective Tension  132
      3.5.1.3 Mathematical Solution  135
      3.5.1.4 Establishing $R_γ$ and $I_γ$  136
   3.5.2 Criteria for Dynamic Stability  137
   3.5.3 Relative Whirl versus Absolute Whirl  138
   3.5.4 Synchronous Whirl Based on Zero Damping  139
   3.5.5 Experimental Measurements of Drill Collar Whirl  140
   3.5.6 Unbalanced Drill Collars  142
   3.5.7 Excitation by Positive Displacement Motors (PDM)  142
   3.5.8 Coupling of Axial and Lateral Vibrations  143
   3.5.9 Stick-Slip-Induced Vibrations  143

3.6 Theories of Axial and Torsion Vibrations  144
   3.6.1 Forced Vibrations  144
   3.6.2 Roller Cone Drill Bits  144

Appendix 3A: Computer Model of Drill Collar Bending Between Multiple Stabilizers 195

Chapter 4 Mechanics of Marine Risers 201

4.1 Static Analysis of Marine Risers 201
4.1.1 Buckling of Marine Risers 201
4.1.2 Static Displacement of Riser in One Plane 205
4.1.2.1 Differential Equation of Bending 205
4.1.2.2 Boundary Conditions 206
4.1.3 Deflection Caused by Rig Offset 206
4.1.3.1 Ball Joint at Lower End 207
4.1.3.2 Flex/Ball Joint 210
4.1.3.3 Fixed Lower End 213
4.1.4 Deflections Caused by Uniform Current Loading 216
4.1.4.1 Differential Equation of Bending 217
4.1.4.2 Method of Solution 218
4.1.4.3 Effective Tension vs Average Effective Tension 222
4.1.5 Tapered Flex Joints 225
4.1.5.1 Equation of Bending 226
4.1.5.2 Parabolic Approximation to Moment of Inertia 226
4.1.5.3 Solution to Differential Equation 227
4.1.5.4 Example Calculation 230
4.1.5.5 Hydrostatic Effects 232
4.1.6 Interfacing Tapered Flex Joints with Uniform Riser Pipe 232
4.1.6.1 Boundary Conditions 233
4.1.6.2 Tapered Flex Joint Section 234
4.1.6.3 Uniform Riser Pipe Section 234
4.1.6.4 Merging the Two Solutions 236
4.1.6.5 Example Calculation 239
4.1.7 Broader Applications of the Closed Form Solution 241
4.1.7.1 Combining Two or Multiple Sections 241
Table of Contents • ix

4.1.7.2  Intermediate Buoys in Riser Pipe 248
4.1.8  Method of Segments 252
4.1.9  Ultra Deep Risers 254
   4.1.9.1  Tapered Flex Joint, Short Riser Pipe, Steel Catenary 255
   4.1.9.2  Tapered Flex Joint Section 255
   4.1.9.3  Short Riser Pipe Section 256
   4.1.9.4  Steel Catenary Section 256
   4.1.9.5  Boundary Conditions 257

4.2  Dynamic Analysis — Natural Frequencies 260
   4.2.1  Differential Equation of Motion 260
      4.2.1.1  Ball Joint Attachment 261
      4.2.1.2  Structurally Fixed at BOP 264
   4.2.2  Natural Frequencies Based on Steel Catenary Model 265
   4.2.3  Alternate Methods for Determining Natural Frequencies 265
      4.2.3.1  Uniform Tension 265
      4.2.3.2  Iteration on Lateral Mode 267

4.3  Dynamic Analysis — Forced Vibration 269
   4.3.1  In-Line Vibration Caused by Ocean Currents and Waves 269
      4.3.1.1  Formulation of Equation of Motion 271
         4.3.1.1.1  Current Loading 272
         4.3.1.1.2  Rig Offset 273
         4.3.1.1.3  Forced Vibration 273
      4.3.1.2  Example Calculation 274
   4.3.2  Vortex-Induced Vibration 275
      4.3.2.1  Self Exciting Mechanism 277
      4.3.2.2  Modal Analysis 278

Appendix 4A:  Cables Suspended in Air 281

Appendix 4B:  Comparison of Steel Catenary Approximation with Elastic Riser 284

References 286
Chapter 5  Applied Drilling Mechanics  289

5.1 Developing a Drilling Program  289
5.1.2 Operational Requirements  289
5.1.3 Design Specifications  290
5.1.4 Creating Design Alternatives  290
5.1.5 Evaluating Alternatives  290
5.1.6 Drillstring Design  291
  5.1.6.1 Drill Bits  292
  5.1.6.2 Roller Cone Drill Bits  292
  5.1.6.3 Polycrystalline Diamond Compact (PDC) Bits  292
  5.1.6.4 Natural Diamond Bits  292
  5.1.6.5 Cost Analysis  293
  5.1.6.6 Bottom Hole Assemblies  296
  5.1.6.7 Positive Displacement Motors  296
  5.1.6.8 Downhole Drilling Turbines  302
  5.1.6.9 Measurement While Drilling Tools  306
    5.1.6.9.1 Directional Drilling  307
    5.1.6.9.2 Vibration Monitoring  309
  5.1.6.10 Stabilized Assemblies  309
    5.1.6.10.1 Building Assemblies  309
    5.1.6.10.2 Holding Assemblies  310
    5.1.6.10.3 Dropping Assemblies  310
  5.1.6.11 Drill Collars  312
  5.1.6.12 Drill Pipe  314
    5.1.6.12.1 Drill Pipe Stress Components  314
    5.1.6.12.2 Bending at Drill Pipe/Drill Collar Interface  316
    5.1.6.12.3 Effect of Dog Legs on Bending Stress  317
    5.1.6.12.4 Tool Joints and Make-up Torque  322
## Table of Contents

5.2 Hydraulics of Rotary Drilling 323
  5.2.1 Mud Pumps 324
  5.2.2 Parasitic Losses 325
  5.2.3 Nozzle Selection 328
  5.2.4 Annular Velocity Requirements 329
  5.2.5 Available Hydraulic Horsepower 330
  5.2.6 Power Demands of Downhole Motors 331

5.3 Optimum Drilling Practices 333
  5.3.1 Drill Bit Selection 333
  5.3.2 Bit Weight and Rotation Speed 334
  5.3.3 Optimum Hydraulics for Drill Bit Cleaning 335
  5.3.4 Impact Force 336
  5.3.5 Pressure Balance 338
  5.3.6 Drilling Mud Properties 338
  5.3.7 Bottom Hole Assembly Design 339

References 339

**Chapter 6**

### Selected Topics in Marine Riser Design 341

6.1 Marine Drilling Risers 341
  6.1.1 Drilling Mode 341
    6.1.1.1 *Effective Tension and Riser Buckling* 342
    6.1.1.2 *Rotation Across Flex/Ball Joint* 342
  6.1.2 Non-Drilling Mode 345
    6.1.2.1 *Replacing Drilling Mud with Sea Water* 345
    6.1.2.2 *Replacing Drilling Mud with Sea Water* 347
  6.1.3 Disconnect Mode 348

6.2 Marine Production Risers 348
  6.2.1 Top-Mounted Tapered Flex Joint 348
  6.2.2 Optimizing Tapered Flex Joints 354

6.3 Bending of Bundled Tubulars Attached To Production Risers 355
  6.3.1 Method of Solution 356
  6.3.2 Example Calculation 361
Table of Contents

Appendix 6A: Bop Suspended at Lower End of Drilling Riser 364

Appendix 6B: Drill Pipe Whirl Within Drilling Risers 367
