

**ASME BTH-1–2011**  
(Revision of ASME BTH-1–2008)

# **Design of Below-the-Hook Lifting Devices**

---

**AN AMERICAN NATIONAL STANDARD**

**The American Society of  
Mechanical Engineers**

**ASME BTH-1-2011**  
**(Revision of ASME BTH-1-2008)**

# **Design of Below-the-Hook Lifting Devices**

---

**AN AMERICAN NATIONAL STANDARD**

**The American Society of  
Mechanical Engineers**

**Three Park Avenue • New York, NY • 10016 USA**

Date of Issuance: January 25, 2012

The next edition of this Standard is scheduled for publication in 2014. This Standard will become effective 1 year after the Date of Issuance.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this Standard. Periodically certain actions of the ASME BTH Committee may be published as Cases. Cases and interpretations are published on the ASME Web site under the Committee Pages at <http://cstools.asme.org/> as they are issued.

Errata to codes and standards may be posted on the ASME Web site under the Committee Pages to provide corrections to incorrectly published items, or to correct typographical or grammatical errors in codes and standards. Such errata shall be used on the date posted.

The Committee Pages can be found at <http://cstools.asme.org/>. There is an option available to automatically receive an e-mail notification when errata are posted to a particular code or standard. This option can be found on the appropriate Committee Page after selecting “Errata” in the “Publication Information” section.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not “approve,” “rate,” or “endorse” any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assume any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,  
in an electronic retrieval system or otherwise,  
without the prior written permission of the publisher.

# CONTENTS

Foreword .....	v
Committee Roster .....	vi
Correspondence With the BTH Committee .....	vii
Summary of Changes .....	viii
<b>Chapter 1 Scope, Definitions, and References</b> .....	1
1-1 Purpose .....	1
1-2 Scope .....	1
1-3 New and Existing Devices .....	1
1-4 General Requirements .....	1
1-5 Definitions .....	3
1-6 Symbols .....	6
1-7 References .....	9
<b>Chapter 2 Lifter Classifications</b> .....	12
2-1 General .....	12
2-2 Design Category .....	12
2-3 Service Class .....	13
<b>Chapter 3 Structural Design</b> .....	14
3-1 General .....	14
3-2 Member Design .....	16
3-3 Connection Design .....	22
3-4 Fatigue Design .....	29
3-5 Other Design Considerations .....	31
<b>Chapter 4 Mechanical Design</b> .....	41
4-1 General .....	41
4-2 Sheaves .....	41
4-3 Wire Rope .....	42
4-4 Drive Systems .....	43
4-5 Gearing .....	44
4-6 Bearings .....	44
4-7 Shafting .....	46
4-8 Fasteners .....	48
4-9 Grip Ratio .....	48
4-10 Vacuum Lifting Device Design .....	49
4-11 Fluid Power Systems .....	49
<b>Chapter 5 Electrical Components</b> .....	51
5-1 General .....	51
5-2 Electric Motors and Brakes .....	51
5-3 Operator Interface .....	52
5-4 Controllers and Rectifiers for Lifting Device Motors .....	53
5-5 Grounding .....	54
5-6 Power Disconnects .....	54
5-7 Batteries .....	54

**Figures**

C3-1	Selected Examples of Table 3-1 Requirements .....	23
C3-2	Block Shear .....	24
C3-3	Pin-Connected Plate Notation .....	26
C3-4	Stiffened Plate Lifting Beam .....	26
4-1	Sheave Dimensions .....	42
4-2	Sheave Gap .....	42

**Tables**

2-1	Service Class .....	13
C2-1	Service Class Life .....	13
C3-1	Design Category A Static Load Spectrum .....	15
C3-2	Design Category A Dynamic Load Spectrum .....	15
C3-3	Design Category B Static Load Spectrum .....	15
C3-4	Design Category B Dynamic Load Spectrum .....	15
3-1	Limiting Width–Thickness Ratios for Compression Elements .....	18
3-2	Minimum Effective Throat Thickness of Partial-Penetration Groove Welds .....	28
3-3	Minimum Sizes of Fillet Welds .....	28
3-4	Allowable Stress Ranges, ksi (MPa) .....	29
3-5	Fatigue Design Parameters .....	33
4-1	Strength Factors for Calculating Load Capacity (American Standard Tooth Forms) .....	45
4-2	$L_{10}$ Life .....	45
4-3a	Key Size Versus Shaft Diameter (ASME B17.1) .....	47
4-3b	Key Size Versus Shaft Diameter (DIN 6885-1) .....	47
4-4	Fatigue Stress Amplification Factors .....	47
